TABLE OF CONTENTS

		PAGE NO.
	LETTER OF INTRODUCTION	(ii)
	ALPHABETICAL LISTINGS OF ORGANIZATIONS INCLUDED	(iii)
	TECHNOLOGY CATEGORIES	
1.	Food Products and Processing	1
2.	Textile Products and Processing	1
3.	Synthetic Fiber (fiber production, processing, raw materials)	2
4.	Pulp and Paper, Wood Products, Lumber	2
5.	Plastics (resins, processes, equipment)	3
6.	Petroleum Refining, Products and Processing	5
7.	Rubber and Plastic Products and Processing	5
8.	Stone, Glass, Clay Products and Processing	6
9.	Metals (smelting, refining, steelmaking)	7
10.	Mining and Extraction (minerals, metals, coal, gas, oil)	8
11.	Industrial Inorganic Chemical Products and Processing	8
12.	Industrial Organic Chemical Products and Processing	9
13.	Agricultural Chemicals (fertilizers, pesticides)	11
14.	Drugs (human and animal medicinal products)	12
15.	Packaging, Graphics, Printing	15
16.	Soaps, Detergents, Cosmetics, Toiletries	15
17.	Paints, Varnishes, Coatings, Adhesives	16
18.	Computers, Data Transmission, Communications and Software	17
19.	Electrical and Electronic Equipment	19
20.	Mechanical Machinery and Equipment	21
21.	Transportaiton and Lifting Equipment	22
22.	Energy (generation, distribution and controls)	23
23.	Pollution Control (gas, liquid, solid)	24
24.	Instruments, Devices, Controls and Systems	25
25.	Photographic Devices, Optical Instruments and Lenses	26
26.	Medical, Surgical and Dental Instruments (devices and supplies)	26
27.	Biotechnology	27
28.	Other (such as: Sports and leisure, plants, horticulture, etc.)	30
	UNIVERSITY AND NON-PROFIT ORGANIZATIONS	32
	TECHNOLOGY TRANSFER CONSULTANTS AND BROKERS	39

5TH EDITION
July, 1986

ALPHABETICAL LISTING OF ORGANIZATIONS INCLUDED UNDER TECHNOLOGY CATEGORIES

A

A.H. Robins Company, Inc. 14
A.M. Liaaen A/S 19, 20, 21
AAR Brooks & Perkins 4, 5, 7, 21
AB Volvo 21
ANT Nachrichtentechnik GmbH 18, 19
ATA Training Aids Aust. Pty. Ltd. 18, 19, 24
Abbott Laboratories 1, 14, 17, 26, 27, 28
Aberdeen Service Company 6, 17, 23, 24
Adidas 2, 28
Advanced Circuit Technology, Inc. 19
Agricultural Genetics Company Ltd. 27, 28
Air Products & Chemicals, Inc. 6, 7, 9, 10, 12, 23, 28
Ajinomoto Co., Inc. 1, 12, 14, 27
Aktieselskabet Nordiske Kabel 12, 18, 19, 22, 24
Akzo Engineering bv 11, 23
Albany Titanium 9, 10
Alco Industries, Inc. 5, 7, 9, 13, 17 23
Alcon Laboratories, Inc. 14, 27
Alcudia, S.A. 5
Alert Packaging Ltd. 1, 5, 7, 15
Alf Hannaford & Co. PTY LTD 13, 20
Alfa Farmaceutici SpA 14, 16, 26, 27
Alfa-Laval Licens AB 1, 4, 11, 12, 13, 14, 17, 19, 20, 21, 22, 23 27
Allelix Inc. 1, 12, 27
Allergan Pharmaceuticals, Inc. 14, 25, 26, 28
Alliflex International Ltd. 5, 13, 19, 26
Allied Instrumentation Laboratory 24, 26, 27, 28
Allied-Signal, Inc. 2, 3, 5, 11, 12, 19, 21, 23, 24
Alumax Inc. 6, 9, 18, 22
Alva-Tech, Inc. 7
Amchem Products, Inc. 5, 11, 16, 17
American Can Company 5, 15
American Cyanamid Co. 2, 4, 5, 6, 10, 12, 14
American Hosp. Supply Corp. 14
American Technology & Ventures 14, 26, 27
Amersham International plc 24, 27, 28
Amgen 14, 27
Ampliform Developments 9, 15, 20
Armco, Inc. 9
Armour Medicamenta S.p.A. 14
Armstrong World Industries 2, 3, 4, 5, 7, 8, 11, 17
Asarco, Incorporated 9, 10
Ashland Chemical Co. 5, 17
Ashland Oil, Inc. 2, 6
Australian Trade Commission 1, 2, 3, 4, 5, 6, 7, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28
Automotive Products plc 21

B

B.F. Goodrich Company 7
BASF Corporation 1, 5, 13, 14, 27
BOC Group Inc., The 14, 26, 28
BW Biotec, Inc. 14, 27
Babcock Woodall-Duckham Limited 10, 11, 12, 13
Badger Company Inc., The 5, 6, 7, 12, 13, 23, 27
Barnes-Hind Vision Care 15, 24, 26, 28
Bauku gmbh 2, 5, 23
Bausch & Lomb, Inc. 14, 25, 26, 27
Baxter Travenol 5, 14, 24, 27
Bayer AG 13, 27
Becton Dickinson and Co. 24, 26, 27
Beecham Pharmaceuticals 14
Bell Canada 15, 18
Bell Communications Research, Inc. 18
Berger, Jenson & Nicholson, Ltd. 17
Biffi S.P.A. 24
Bionics A/S 7, 18, 21, 24
Biotechnica International, Inc. 13, 23, 26, 27
Black & Decker Corporation, The 19, 20, 24
Block Drug Co., Inc. 14, 26, 27
Boeing Company, The 5, 11, 12, 17, 19, 20, 24, 25
Boots Pharmaceuticals, Inc. 14
Borax Research Ltd. 2, 4, 12, 27
Borden, Inc. 1, 5, 7
Borg-Warner Chemicals, Inc. 5, 12, 16, 27
Bridgestone Australia Ltd. 5, 7
Bristol-Myers Company 1, 14, 27
Bristol-Myers Products 14, 15, 26, 27
Britax Ltd. 7, 21
British Ceramic Research Ltd. 8
British Telecommunications plc 18, 19, 20, 24, 25
Brockway, Inc. 15
Broken Hill Proprietary Company 3, 8, 9, 10, 11, 17, 18, 20, 21, 22, 23, 24
Budd Company, The 7, 9, 21
Burlington Industries Inc. 2, 3
Butagaz 6, 20, 22

C

CBS Technology Center 18, 19
CDF Chimie S.A. 5, 7, 12, 13, 17
CIBA-GEIGY Limited 13, 14, 27, 28
Cambridge Electronics Industries p.l.c. 19, 20, 24, 26
Canada, Department of Regional Industrial Expansion 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24 25, 26, 27, 28
Carbon Fuels Corporation 12
CarbonTeknologies Corporation 10, 12, 18, 28
Carlos De Sousa E Briro & Associates 18, 22, 23
Carter-Wallace, Inc. 24, 26, 27
Caterpillar Tractor Co. 7, 18, 20, 21
Cavelier Abogados 18
Celltech Ltd. 14, 27
Central Electricity Generating Board 18, 19, 20, 22, 24
Centre d'Etudes et Recherches de Charbonnages de France 10, 18, 19, 24
Champion International Corporation 4, 23, 24
Champion Spark Plug Company 7, 20, 21, 26
Chevron Research Company 5, 6, 10, 12, 16, 18, 23
Citroen 20, 21
Coca-Cola Company, The 1, 5, 15, 18, 20, 27
Coldstream S.A. 9
Columbia Gas System Service Corp. 22
Combustion Engineering, Inc. 20, 22, 23, 24
Cominco Ltd. 9, 10, 13, 23
CommTech International 3, 9, 14, 19, 24
Communications Patents Ltd. 18, 19
Compagnie De Raffinage 6, 10, 12, 22
Confab Industrial S/A 6, 20, 22, 23
Connors & Associates 19, 27
Consolidated Natural Gas Co. 12, 20, 22
Cooper Biomedical 14, 27
Cooper Industries 19, 20
CooperVision, Inc. 14, 26
Cosden Technology Inc. 5, 12
Costain Petrocarbon Limited 5, 6, 7, 12, 13, 17, 22
Council for Mineral Technology (MINTEK) 9, 10, 11, 24
Courtaulds Research 3, 4, 12, 26
Crawford & Russell, Inc. 5, 12, 14, 27
Cross & Trecker 20, 24
Crown Zellerbach Corp. 3, 4, 15, 17
Cyanamid of Great Britain, Ltd. 14, 26, 27
Cyberfluor Inc. 24, 26, 27

D

DAK-Laboratoriet 14
DSM 3, 11, 13, 22
Dainichi-Nippon Cables, Ltd. 7, 18, 19, 23, 24, 25, 28
Dainippon Ink & Chemicals, Inc. 5, 12, 15, 17

Kraft Inc. 1, 15
Kubota, Ltd. 7, 8, 20, 27

L

L'Air Liquide 11, 28
Laboratoires Debat 14
Laboratoires Fournier 14, 17
Learning Things, Inc. 25, 28
Ledex Inc. 18, 19
Lee Cooper Licensing Services Ltd. 2
Lehn and Fink Products Company 4, 16, 17, 27
Liberty Technology Center, Inc. 18, 19, 20, 22, 24
Litton Resources Group 10, 18, 28
Lockheed Missiles & Space Company, Inc. 28
London & Scandinavian Metallurgical Co. Limited 9, 11
London International Group plc 7, 14, 26
Lonza, Inc. 4, 11, 16, 24
Lord Corporation 7, 17, 24
Lubrizol Enterprises, Inc. 13, 14, 27, 28
Lucas Industries PLC 7, 8, 19, 24
Luwa Ltd. 20, 23, 26

M

3M 5, 7, 12, 14
M Corporation Ltd., The 5, 6, 10, 13
M&T Chemicals Inc. 12, 14, 15, 27
M.A.N.-B & W Diesel GmbH 20, 21, 22
Magnavox Advanced Products and Systems Co. 18, 19

TECHNOLOGY CATEGORY: 01 FOOD PRODUCTS AND PROCESSING

COMPANY NAME	COMPANY CONTACT	LICENSE INTEREST	SPECIFIC AREA OF INTEREST
Abbott Laboratories	Bernard, R.M.	IN	
Ajinomoto Co., Inc.	Shiro, T.	IN	Sweetner, Flavor-enhancer and other food additives
Alert Packaging Ltd.	Burke, J.	IN	Packaging to extend shelf life of foods
Alfa-Laval Licens AB	Voss-Schrader, B.		Dairy farm milk, ice cream, beverages, prepared/ready foods, yeast, alcohol, starch, sugar production, milk and fish processing
Allelix Inc.	Strachan, G.	BOTH	
Australian Trade Commission	Gaynor, N.	OUT	
BASF Corporation	Schwendemann, V.M.	IN	Vitamins
Borden, Inc.	Maskas, G.P.	BOTH	
Bristol-Myers Company	Bloem, R.J.	IN	
Canada, Department of Regional Industrial Expansion	Dagpinar, V.S.	BOTH	
Coca-Cola Company, The	Brooks, W.D.	BOTH	Soft drink, citrus beverages, juice beverages, coffee, tea and frozen juice products
Dart & Kraft, Inc.	Taylor, L.B.	IN	Dairy products and processing
Davy McKee Corporation	Kirchner, E.A.	BOTH	
Douwe Egberts R and D	Wouda, I.H.	BOTH	Coffee, tea, other beverages
Eastman Kodak Company	Dunn, W.E.	BOTH	Human & animal nutrition products, antioxidants, mono-glycerides & vitamin E
Engineering Services (Whg) Ltd.	Vazey, S.B.	IN	
Firmenich SA	Salvadori, G.	BOTH	Flavors
General Mills, Inc.	Ducharme, C.L.	BOTH	
H.J. Heinz Co.	Bierkan, D.A.	BOTH	
Hercules Incorporated	Carroll, J.F.	BOTH	Water-soluble polymers & gums, flavor, & fragrance chemicals
	Scott, R.B.	BOTH	
Hilton-Davis Chemical Co.	Threader, D.H.	IN	
International Multifoods Inc.	Sirko, I.A.	BOTH	
Kraft, Inc.	Staackmann, J.W.	BOTH	
Mallinckrodt, Inc.	Klostermann, R.J.	IN	Food flavors
Mitsubishi Chemical Industries Limited	Mangyo, M.	OUT	Fructose separation process
Mundipharma AG	Sutter, E.	BOTH	
National Enterprise Agency	Mealy, M.	IN	
National Research Laboratories	Katona, A.M.	OUT	Protein isolation, concentration; whey, blood processing; cheese manufacture
Nobilent, Inc.	Dolfini, J.E.	BOTH	
PQ Corporation	Posner, E.G.	IN	Processing aids, cleaners
Pfizer Inc.	Wolff, J.S., III	IN	Sweeteners, fermentation products, natural flavors
Procter & Gamble Company, The	Grounds, P.W.	IN	
	Witte, R.C.	IN	
Sunkist Growers, Inc.	Anderson, W.G.	OUT	Post-harvest fruit inspection and packing equipment
Suntory Limited	Kubota, Y.	BOTH	
Tate & Lyle PLC	Fewkes, D.W.	BOTH	Sugars, high intensity sweeteners and flavorings
Toyo Engineering Corporation	Ito, H.	BOTH	
Toyo Jozo Co. Ltd.	Kuramoto, M.	BOTH	
Trebor International Limited	Baily, A.A.J.	OUT	Chocolate and sugar confectionery
U.S. Dept. of Commerce	Auber, R.P.	OUT	Carbohydrates
	Campion, D.J.	OUT	
UOP Inc.	Robell, A.J.	BOTH	Enzymes; separations; catalytic processing; sweeteners; fatty acids
Unilever Group	Tate, R.V.	BOTH	All types including human and animal foods
Van Leer, B.V.	Spier van Zwicht, O.	BOTH	Metal, flexible film and paperboard
Viskase Corporation	Winton, G.P.	BOTH	Meat, poultry, fish and cheese

TECHNOLOGY CATEGORY: 02 TEXTILE PRODUCTS AND PROCESSING

COMPANY NAME	COMPANY CONTACT	LICENSE INTEREST	SPECIFIC AREA OF INTEREST
Adidas	Den Bossche, V.	BOTH	
Allied-Signal, Inc.	Rivers, L.W.	BOTH	Nylon and polyester

ware and graphics simulation for fire training and devices for risk assessment and monitoring plus mobil communications, radiation hazards and powder technology.

British Columbia, University of
Dr. James Murray

Seeking co-operative research projects and funding in all disciplines, especially biotechnology, metallurgical engineering, and medicine with especial emphasis on automotive squish jet combustion chamber, modems for transmission of data over power lines and NMR imaging techniques.

Brown University Research Foundation
William M. Jackson

Brown University Research Foundation provides technology transfer services through the licensing of patents and copyrights and arranges cooperative research programs with corporations. The University spends $35 million on research annually. Two free directories, *Biomedical Research at Brown* and *Directory of Science and Engineering Research* are available upon request.

Brunel University
G. L. Burkitt

Offer technology in categories 5, 7, 9, 11, 12, 14, 18, 19 and 20.

C.R.C.
Alain Cadix

Special expertise in computers, data transmission, communications and software.

The Canadian Industrial Innovation Centre
J. Ross Knechtel

We are a non-profit organization which engages in development and marketing activities in order to expedite technology transfer. We employ our own funds, or seek external funding as appropriate. We seek technical or financial co-participants in the areas of electrical or mechanical devices, instrumentation (chemical, physical, or optical), biotechnology, or coatings for industrial or consumer applications.

Canadian Patents and Development Limited
W. D. Gordon, D. C. Cryderman, K. F. Crowe

A Crown Corporation, reporting to the Parliament of Canada through the Minister of Regional Industrial Expansion, which assesses patents in Canada and other countries, and licenses to industry the industrial and intellectual property arising out of research and development conducted in the laboratories of the Government of Canada, Crown Corporations and Agencies, Universities and other publicly financed institutions, and industrial and intellectual property resulting in the private sector from certain government financed research and development. Offers technology in all listed categories.

Cediquifa
Dr. Felix Rozanski

We are in close contact with manufacturers and with local research institutions with projects in animal and human health and biotechnology.

Chalmers University of Technology
Ove Granstrand

Technology interests in categories 18 and 19 with especial interests in main frame computers, video tape recorders, and telecommunications and information technology.

Chambre De Commerce De Paris
Mme. Bouyssi-Ruch

Interested in assisting technology transfer in all categories.

Children's Hospital - Boston
Alhert L. Broseghini

A pediatric research hospital having an interest in biotech, monoclonals, drug delivery systems, diagnostics, dyes, medical devices, computer graphics, surgical implants, infectious agents, immunology, molecular genetics who will conduct clinical trials in pediatric population.

Cincinnati, University of
C. Thomas Cross

Seeks cooperative research or outside funding relative to mechanical engineering; chemistry - polymers; chemical engineering; medical/biomedical apparatus, processess, diagnostics, medicines/drugs, and drug delivery systems; membranes; and/or robotics.

Cleveland Clinic Foundation, The
F. J. O'Neill

The Cleveland Clinic Foundation is committed to seeing its developments commercialized through cooperative research agreements, joint ventures and licensing. The

Innovation Institute
Olay Thrap-Olsen

The Institute may work in collaboration with outside clients who have defined an interesting area of innovation. Through its wide experience and extensive network of innovators and scientists the Innovation Institute can enter almost any field of technology in which a client may be interested. Especially interested in technology categories 13, 17, 22 and 28.

Iowa State University Research Foundation, Inc.
Spencer L. Blaylock

Over 50 million dollars in research primarily in animal science, animal health, chemical and electrical engineering and food technology. Have established centers of excellence in biotechnology, microelectronics, nondestructive evaluation, rare earth chemistry and veterinary medicine. Offering technology in categories 1, 12, 13, 14, 18, 19, 20, 22, 24, 27 and 28.

Japan Institute of Invention & Innovation
N. Ohsawa

A public service corp. authorized by Japanese Patent Office since 1904 whose purpose is to expedite Japan's scientific and tech progress mainly by encouraging invention and providing patent info. Main activities: Commendation of excellent inventions, holding of invention exhibitions, devel. of the youth's creativeness, distribution of the Official Gazettes of dissemination of the Patent Abstracts of Japan, and dissemination of info. relating to indus. property, publication, consultation service of invention and industrial property, and settlement of related disputes, research and talent education relevant to industrial property. Category no. 28 (patent info. svcs.)

John Hopkins University, The
Francis J. Meyer

Offers technology in categories 14, 24 and 27.

Kansas State University Research Foundation
Dr. John O. Mingle

The Kansas State University Research Foundation manages most intellectual property for Kansas State University including patent prosecution and patent licensing. Typical fields including biotechnology, computer software, chemistry animal science, grain science, engineering and plant science.

Kent Scientific & Industrial Projects LTD
Bernard Watts

Co-ordinates contacts between the U of K, England and industry, world-wide. The principal activities are contract R & D and consultancy. The areas of research cover a broad spectrum of topics in the disciplines of biology, chem, computing, electronics and physics. Arrangements can be made to establish corporate R&D activities on the campus using university facilities or for collaborative projects.

LEDU
Mrs. E. Butterwick

We seek co-operative research for R & D work and for work on new products. At present this is carried out with the two universities in the province, government agencies and to a lesser extent Trade Associations.

Lehigh University
Dr. Bruce M. Smackey

Interested in technology in categories 1, 5, 11, 12, 18, 20, 22, 23, 24 and 27.

Liverpool, University of
Dr. R. Hewitson

The University is at the forefront of research in many areas of science, medicine and engineering and seeks opportunities for collaborative research with special interest in RIM and injection molding of fibre reinforced resins, VLSI, microelectronic materials, fibre optic communication, mathematical software, computer control of manufacturing process and no contact measurement and unique materials for medical implants.

McGill University
Dr. Pierre Chollet

All areas of science, engineering, medicine and agriculture. These correspond to four active faculties of McGill University from a research standpoint. Examples of strong areas from the invention (patenting, licensing) viewpoint are: Process - regarding product composition of matter - regarding science: chemistry, physics, biology; engineering: mining & metallurgy, electrical (robotic, etc.), chemical; medicine: the Cancer Institute, microbiology, radiation oncology, etc.; agriculture: plant science (herbicides), food science, agri. eng. animal science, etc.; and computer software.

New Zealand Department of Scientific and Technical Research
Dr. George F. Stuart

Physics and Engineering Laboratory, a major division of the Department of Scientific and Industrial Reseach, is a goverment agency with wide interests and responsibilities for research and development in New Zealand. Work is wide ranging and multidisciplinary. There is close cooperation with similar agencies in other countries and with industry for whom a lot of research and development work is undertaken. Developments in diverse fields are available for licensing and there is an interest in cooperative research relevant to New Zealand with especial interest in categories 18, 19, 20 and 24.

Pulp and Paper Research Institute of Canada
J. Merka

A non-profit research and educational organization serving as the Canadian pulp and paper industry's complementary research arm whose primary purpose is to provide its member companies with basic and applied research findings and license inventions and carry out contract research for non-member companies with especial interest in categories 4, 11, 12, 17, 18, 23, 24 and 27.

Queen's University of Belfast
J. Potts

We seek opportunities for cooperative research over a broad spectrum particularly in agriculture and food science, medicine (including dentistry), engineering (civil, chemical, electrical, electronic and mechamical) physics, chemistry and computer science offering technology for small two cycle engines and turbines, synthetic peptides moneclonal antibodies and DNA sequencing, wave energy and power system monitoring and control plus detection and treatment of orthopaedic disorders including prosthesis.

Research Corporation
H. Gordon Howe

Research Corporation administers inventions for academic and scientific nonprofit institutions. At any one time it has a portfolio of several hundred inventions available for licensing or other forms of commercialization in all areas of science and technolgy.

Research Corporation Limited
Dr. Charles D. Desforges

Licensing of medical, chemical and physical science technologies developed by United Kingdom Universities.

Sheffield, University of
R. D. Handscombe

Offers technology for new alloys, processing materials, diagnostic devices, plant cells, ceramics and composites. In addition a variety of technical innovations emerging from a broad range of science, engineering and materials departments.

Small Business Institute
John L. Ewing-Smith

Involved in Economic Development of Hainan Island, PRC. Technology categories 12, 13, 18 (Educational Software) and 28 (Education Technology in business, sciences and Economic Development).

Techsearch Inc.
R. J. Taylor

Special expertise in agricultural engineering, building & construction materials, built environment & settlement studies, chemical technology, colloids & surface chemistry, computer applications, concrete strength & weathering, digital communications, drug evaluation, energy research, high current/voltage testing, industrial control & automation, information management/ systems, market research & survey design, measurement and instrumentation, microelectronics & VLSI design, operations research, project management/life cycle costing, radiographic testing, rail transport, small business, soils engineering, sensors - chemical & physical, statistics.

Texas, University of
Marjorie Forster

Offering technology in categories 14, 26 and 27.

Toledo, University of
Dr. William Roll

The University of Toledo's Center of Applied Research and Invention offers technology in categories 12, 14, 18, 19 and orthopedic devices of category 26 plus animal tissue culture devices of category 27.

University College London
Dr. Margo Goldspink

Applied work is undertaken in many specialist areas within fields of engineering, environmental studies, science, biological, medical and clinical sciences. Some special areas include fibre optics, thin films, bioengineering, public health engineering, photogrammetry, microwave and communications technology, non destructive testing. The Academic Services Unit offers technology in categories 18, 24, and 27 and many

These organizations have submitted the following information about their activities, especially their services in connection with assisting others in technology transfers, including any areas of technology where they have special knowledge or concentrate their efforts.

Abrasom International Group
Stanley M. Abramson

Since 1971, our organization has actively participated in international technology transfer programs, i.e., working with off-shore technology coming to the United States and United States' technology going off-shore. We are heavily experienced in international negotiations and are competent to implement feasibility studies and strategic business plans incorporating technology transfer--maximizing financial pay-out. Activities to date have been "Categories" 1, 11, 12, 13, 14, 16, 18, 26 and 27.

Actinove
Roland Fabre

Actinove is a firm of management consultants specializing in the commercial aspects of licensing (search for new technologies and for licensees). We are involved in the technological evaluation and promotion of new products, opportunity market research and negotiations. Our areas of expertise cover categories 1, 7, 11, 12, 15, 18, 19, 20, 21, 22, 24 and 27 in Europe, North America, Australia and Japan.

Adelaide Innovation Centre
John Taylor

The Adelaide Innovation Centre has been established as a non-profit organization to assist innovators in all stages of the innoculation process. Specifically, the Centre provides independent assessment of market potential, technical feasibility and commercial viability in order to facilitate licensing arrangements or investment in new business ventures. Where appropriate, the Centre will fund prototype development and provide "incubation support" for promising new ventures.

Cruzan Alexander
Cruzan Alexander

International consulstant, expert witness and arbitrator in intellectual property law and practice in all technical categories and all legal phases with over 43 years' legal experience. Author, lecturer and inventor. Past President of the Licensing Executives Society (USA and Canada). No limitation on type of clients represented or sought. Specialties include negotiations, drafting, valuation and management.

American Products Network
Ernest R. Jones

Represent American companies seeking to identify suitable licensees and licensors. Assist American clients in negotiating license agreements for products, processes, technology transfer, trademarks, and joint ventures worldwide. Specialize in laser, fiber optics, satellite, telecommunications, CAD/CAM, R&D, robotics, photovoltaics, and artificial intelligence (esp. expert systems).

Anderson Broome & Co., LTD.
John A. Gay

Anderson Broome & Co., LTD gives specialist advice to companies and governments on the practice and policy of technology transfer.

Applied Technology Co. LTD
M. D. Newman

Aerospace technology where products and processes can be adapted for non aerospace markets, as well as the license of electronic/avionic technology between United Kingdom and USA.

Arni Hytech Consultants
Dr. V. R. S. Arni

We specialize in the licensing of technology into and out of India in the following fields: industrial organic chemicals, petrochemicals, industrial plastics and engineering plastics manfacture, plastics conversion technologies and certain major end-products areas (surfactants), corresponding categories 5, 6, 12 and 16. We also provide market research, project and licensing environment analysis to licensor and licensee organizations.

Arthur D. Little Enterprises, Inc.
Edward J. Kenney

The invention management team does not specialize since all tech areas are of interest. The following areas are especially of interest: 5, 7, 9, 12, 14, 18, 19, 20, 22, 23 and 26. At no obligation the ADL staff will conduct a preliminary evaluation of the product or process. If evaluation proves favorable, ADL will handle the invention at its own expense in return for a share of any licensing revenues which may be obtained.

concentration, process monitoring systems; and industrial inorganic chemical processing, specially roasting, gas cleaning, arsenic and mercury removal and recovery.

John E. Bowler
John E. Bowler

Engineer economist specialising in intellectual property management and the technical and commercial aspects of licensing. Valuations of Intellectual Property, Royalty Rate analysis, drafting and negotiation of licenses. World-wide contacts and experience with expertise in Groups 9, 19, 20, 21 and 22 particularly threaded fasteners, domestic electrical equipment, automotive components.

Brendan J. Fowlston & Company
Brendan J. Fowlston

Specialize in technology transfer of computer hardware and software, communications equipment, pharmaceuticals, biotechnology for small to medium sized clients with products filling specialist niches in the market place.

Bruderer Management Consultants
Werner Bruderer

Specialize in intellectual property management, licensing, negotiations, diversification studies, project management for technology transfer and innovation projects, technical and commercial market studies, patents, designs and trademarks prosecution for inventors, manufacturing and/or sales companies, marketing organizations and investors in the categories 1, 2, 7, 17, 19, 20, 21, 23, 24 and 26.

Bugnion S.p.A.
Paolo Pederzini, Giuseppe Righetti, Franco Zorzoli

Specialize in industrial property consulting.

Business Development Associates, Inc.
Gordon J. Bockner

We represent clients both seeking and developing technologies in PET processing and containers, rigid plastics for food use and plastic recycling.

Business & Technology Centres Pty. Ltd.
T. I. Morris/K. G. Gardiner

Specialize in categories 1 and 28, offering technology on provision of EELs and special alcoholic liquers, cloned plants by tissue culture methods, plus ti-tree oil *(melaleuca alternifolia)* for use in pharmaceuticals, medicines, cosmetics, fungicides, etc., and providing international representation, support and services, plus specialist, wide-range consultancy.

The William Butler Company
William A. Butler

Licensing and technology transfer consultant. Assists organizations in technology transfer agreements - both licensing IN and licensing OUT. Will conduct licensing search and market studies internationally. Will evaluate prospective licensing partners or evaluate possible distribution channels and candidates. Specialize in categories 2, 5, 7, 9, 13, 15, 19, 20 and 24.

B. W. Duckham & Company
Bruce William Duckham

Specializes in licensing both in and out of Australia and internationally.

Cambridge Consultants Ltd.
C. J. Coffin

Cambridge Consultants is a contract research and development company active in electronics, applied physics, mechanical engineering and computing which licenses technology developed on its own account and on behalf of clients. Specific examples include non-impact printing (including ink-jet systems), optical sensors and transducers, biochemical and biophysical sensors and immobilisation supports, and software for expert systems.

Castillo, Laman, Tan and Pantaleon
Noel A. Laman

Specialize in technology transfer for pharmaceutical and food manufacturing industry.

CENTEC
Hans Moller Andersen

Consultants and intermediaries in the fields of energy, environment, food and biotechnology with especial interests in combustion of coal and biomass and renewable energy sources - wind, solar, wave.

Chemical Consultants International, Inc.
Dr. E. M. Bellet

Specialize in licensing pharmaceutical, animal health and agrichemical product development for U.S. and overseas clients requiring assistance in establishing programs of research, testing (clinical and/or pre-clinical)

DFC Ventures
B. J. G. Bewick

Specialize in technology transfer for software, horticulture development, electronics and biotechnology and in the development of technology related to these areas.

Development Finance Corporation of New Zealand
Gerda Yska

Specialize in technology transfer for individuals, private inventors, government sources (universities, ministries) and private companies.

DOFITT International
Ir. J. van der Kolk

An intermediary between Dutch and foreign companies for international technology transfer. Assistance is given to Dutch companies in offering their technologies/products to foreign companies, as well as in searching for them for new technologies/products being offered from outside the Netherlands presently seeking, on behalf of their Dutch clients, products for manufacturing under license in The Netherlands.

Drug Planning International
Wolfgang Huber

Specializes in drugs and biotechnology (27) particularly the international phases of product and manufacturing technology licensing and/or transfer, both in and out.

E. J. Kuuttila & Associates
Lisa Kuuttila

Technology areas of specialization are categories 18, 19 and 28 and semiconductors by providing studies of potential markets and technologies; strategic marketing recommendations; and license and transfer technology recommendations plus seminars for clients on strategic technology licensing; licensing as a part of a company's overall marketing strategy.

Elf Aquitaine
M. Rames

Specializes in transfer of technology for categories 5, 6, 7, 8, 10, 13, 16, 22, 23, 24 and 26.

Elling Licensing ab
Karl G. Elling

Specialty not limited to any particular technology category.

Eltech Systems Corporation
V. H. Thomas

Specializes in obtaining or offering innovative technology for electrochemical processes for the reduction of energy consumption, processes and products also for clients in water treatment and equipment and processes for the steel industry.

Empresarios Agrupados
Antonio Caretti

Specializes in providing engineering or consultant service related with design, construction and operation of nuclear and fossil power plants and similar facilities.

Enterprise Investments
R. C. Bassett

Enterprise Investments is a public company whose formation was sponsored by the South Australian Government. It provides equity and loan finance to new and established businesses in South Australia. Preference is given to businesses that display outstanding prospects for growth. One of the Company's investment criteria is a range of products or services that are innovative and provide a competitive advantage which will enable the business to rapidly achieve an acceptable market share and profitability.

Express Dairy International Services
Dr. G. M. Murphy

Assists technology transfers by offering feasibility studies, plant design services, project management, operational training for large scale-efficient dairy facilities with specialties in categories 1, 23 and 27.

Fla La Creatique
Francois Libmann

Specializes in assisting companies in defining innovation and diversification policies in any technology field.

John A. Fraser
John A. Fraser

Consultant in development and creation of technology opportunities. Specializes in technology related interactions between universities and corporations; corporations and government and small corporations and large corporations. Disciplinary speciality are life science related, medical, veterinary, diagnostic, or therapeutic.

Dr. Bernard Hediger
Dr. Bernard Hediger
Specialist in pharmaceutical law, intellectual property, and European freetrade law.

S. A. Heijn
S. A. Heijn

Specialize in technology marketing and sourcing using licensing, acquisition, merger, joint ventures and subsidiary organization for technology in all categories, worldwide, but with emphasis on Eastern Europe. Basically, all types of technologies are handled by ad hoc specialists, with especial experience in categories 1, 7, 8, 10-14, 16, 19 and 21.

Salomon Herbst
S. Herbst

Assisting in the engineering-economic aspects of technology transfer (in and out). Consulting focuses on the full range of technical measures required in a licensing process by licensee or licensor. The assistance covers the entire spectrum from the feasibility study to the start-up of a plant and/or the production of a licensed product. Specializes in categories 1, 9, 20 and 21.

Dr. Valentin Heuss
Dr. Valentin Heuss

Commercial and strategy consultant for licensing joint ventures and contracting of industry and commerce with experience in preparation of concepts, negotiating of agreements, planning and supervision of license performance.

H & H Consultants
Jules J. Haberman

Specialized in technology transfer relative to categories 13, 14, 26 and 27 with experience in identifiying new products.

Hilliard-Lyons Patent Management, Inc.
F. H. Boos

Specializes in licensing patentable inventions in categories 6, 8, 10, 12, 15, 17, 20, 21, 26 and 28 and evaluating patents and technology packages.

H. M. Hood
H. M. Hood

Specializes in technology licensing in human or animal health fields, chemistry biology and instruments as set forth in categories 13, 14 and 24-27.

Hornbuckle, Martin & Camp P.C.
Hope H. Camp, Jr.

Engaged in negotiating and obtaining government approval as required of licensing agreements in the United States, Mexico and other parts of the world.

Horwath & Horwath
R. E. Bucknell

Specializes in reviewing potential markets for new technology, financial modelling and planning for development and growth management and organizational review for corporate requirements having particular interest in categories 12, 13, 14, 22, 23, 26 and 27.

Swabey, Mitchell, Houle, Marcoux & Sher
Guy Houle

Represents inventors, university research centers and small to medium size corporations primarily in the mechanical and electrical/electronics field particulary interested in licensing out and consider joint ventures.

HRI Inc.
Lawrence I. Wisdom

Specializes in the licensing of its own technologies in the areas of category No. 6 with special emphasis in heavy oil upgrading, and category No. 12 with emphasis on the processing of coal. Furthermore, HRI develops new technologies with specific clients in the petroleum and petrochemical industries.

Hug Interlizenz AG
Max Bosshard

Services cover all aspects of legal and commercial consulting related with licensing, transfer of technology, including turnkey contracting in all technology categories.

International Business Development
J. R. Pullen

Represents customers by identifying companies in customer base who are likely to be interested in specific areas of technology.

IMY Associates
C. Thomas Cross

Specialists serving business, industry, universities, individual licensing consultants. Patent surveillance, independent technical and patent evaluation of third party ideas/proposals, prior art searches, patent training seminars, representation at technology exhibitions.

Vincenzo Di Iorio
Vincenzo Di Iorio

Specializes in all problems connected with the industrial property field.

Inventure Inc.
Bengt Lagergren

An independent entrepreneur exploiting new technology relating to ferro-electric LC technology, electronics, computer terminals, telecommunications and office automation.

Howard H. Irvin Associates
Howard H. Irvin

Specializes in technology transfer for categories 5, 7, 12 and 27 for medium size and multinational companies in USA, Europe, Japan, Australia with especial interest in unique products and processing for niche marketing.

ITEC Group
Duncan A. MacKillop

Represents both large and small companies seeking new business and technology in categories 5, 7, 12 and 26 using associates in the United Kingdom and having capability for current awareness information on technology, products, market assessment.

Jaakko Poyry Oy
Jukka A. Nyrola

Provides independent consulting services for the pulp, paper, wood, chemical and other process industries. The services include consulting, design engineering, forestry, management services, environmental control, market research, and research and development.

Ernst A. Jaffray
Ernst A. Jaffray

Representing various individuals, companies etc., who are interested in licensing "in," "outs," new products, and the like, on a world-wide basis.

Japan Machine Trading Inc.
Seitchi Suzuki

Specializes in technology categories 1, 5, 7, 15, 19, 20, 21, 22, 23, 24 and 27.

Japan Research Development Corporation Associates
H. Harada

Function to expand the use of new tech, importing from other countries for use in Japan, and exporting to other countries from Japan, upon its clients requests. Interested particularly in categories 14, 18, 19, 26 and 27.

J. C. Jenkins
J. C. Jenkins

Specializes in technology transfer of copper refining and rolling and in negotiation of terms of license to use new technology know-how and patents.

J.K.A./Transtech
J. Kitching

Specializes in technology transfer of biotechnology applied to crop improvement and animal husbandry and electronics applied to test and and measurement instruments.

John & Kernick
N B Swart or C K Job

Consultants on contracts and currency exchange control relating to the licensing of intellectual property rights handling all technologies with emphasis on categories 5, 6, 7, 9, 10, 11, 12, 13, 14, 18, 19, 20, 21, 22, 24 and 26 specializing in major African countries, particularly Southern African region.

Jordan and Hamburg
C. Bruce Hamburg

Specializing in repesenting clients desiring to transfer technology in all categories.

F. R. Kelly & Company
Peter Kelly

Specializes in technologies categories 1, 15, 16, 20, 27 and in building products particularly insulation boards, wall ties, cavity blocks, paving/patios blocks.

Kelvin Lord and Company
Kelvin Lord

Represent a substantial number of small to medium size businesses in Western Australia in intellectual property matters who are interested in licensing in Australia and especially Western Australia primarily as regard to agriculture and mining technologies who are also interested in technology transfer in areas such as railways equipment manufacture and electrical electronic subject matter including software.

MacMillan and Associates, Inc.
J.H. MacMillan

Assists companies in selecting and implementing international business strategies, including exports, licensing (in and out), joint ventures, sourcing cooperative production and subsidiary operations with people having "hands-on" experience in management, marketing and manufacturing in foreign operations.

March Technologies Ltd.
Stuart Seymour

Specializes in tailored projects in the industrial sector for clients wishing to buy, sell or license technology by establishing marketing technology on behalf of owners and developers, e.g. individuals, universities, research establishments, companies, and searching for technology on behalf of purchasers and licensees e.g. companies.

Guido Martelli & C.S.A.S.
Guido Martelli

Specializes in technology categories 5 and 15 as regards particular processes and equipments for thermoforming of plastic sheet, including EPS sheet and particular plastic packaging especially for fruits, vegetables, food, sweets, etc.

Master Data Center, Inc.
Ronald C. Knudson

Specializes in patent, trademark, and license and agreement management with programs and services to the Fortune 1000 and high tech companies, and law firms who manage this information for their clients.

Bernard A. Meany
Bernard A. Meany

Manage and implement the commercial and government relations aspects of technology and its transfer with special emphasis on computers, communications, electronics and biotechnology. Clients include corporations, universities, foundations and governments. Geographic areas of expertise include Latin America, Asia and Europe -- in addition to the USA.

OY Mec-Rastor AB
Pentti Soderlin

Specializes in the in- and out- licensing of categories 4, 9, 10, 20, 21, 22, 23 and 28.

M.I.B. -Mercantile Italo Britannica
Dr. Ing E. de Sabata

Specializes in assisting in transfer of technology between the main aircraft/helicopter/missile/aero engine companies by way of license or joint venture agreements ranging from the complete final product to the main subsystem (e.g. radar, landing gear, engine fuel system, etc.).

Dr. John Midgley and Associates
Dr. John Midgley

Specializes in technology transfer of software, novel machining systems, electro discharge, electro chemical; bearings and bearing materials, and medical and also measuring instruments; and in searching for technology in universities on behalf of industrial clients.

Zivko Mijatovic & Co.
Zivko Dj. Mijatovic

Specializes in joint ventures, licensing, transfer of technology in and out, industrial property matters and commercial law business with clients from the field of mechanical & power engineering, chemical and pharmaceutical engineering, pneumatics and robotics.

Austin R. Miller, P.C.
Charles N. Quinn

Speccializes in soft and hard goods in the medical field (particularly x-ray and orthopedic areas), electronic storage batteries and ancillary equipment, railroad track maintenance and repair equipment and voltage controlled amplifiers and related components and circuitry, principally for the audio industry.

Dr. Renzo M. Morresi
Dr. Renzo M. Morresi

Specializes in general licensing, particularly in connection with the technology categories specified hereinbelow, licensing of related trademarks, relating franchising agreements for manufacturers (licensors and/or licensees) in the following fields: 7 (bags and suitcases); 9 smelting and fabrication of precious metals and of artistic products; 14 and 26 human drugs and medical instruments; 20 and 21 motor vehicles, agricultural and other machinery and equipment; related parts; 27 biotechnology in the field of agri and horticulture; 28 fruitplants and grapes; sports and leisure wear; fashion: men's, women's and foot wear.

T. Ohe & Associates, Inc.
Takeru Ohe

Specializes in finding and developing technology-based opportunities for Japanese and others in international markets in the form of joint ventures and distribution and licensing agreements, with especial interest in biotechnology, electronics, new materials, sensors, speciality chemicals, new service businesses, semiconductors and manufacturing equipment and instrumentation.

Original Enterprises, Inc.
Winn Parker

Broker for artificial intelligence and medical telecommunications projects that involve laser lightwave inventions for clients that need sophisticatd telecommunication patent development and licensing for patentable inventions for new start-ups with especial interests in artificial intelligence and cryptographic technology, new instruments, medical, surgical and dental instruments and new vaccines.

Pacific Basin Technologies, Inc.
Leonard Bloom

Specializes in technology transfer of proprietary products made of metal and/or plastic which can be manufactured in Taiwan with especial experience in categories 19, 20 and 21.

Provaltec
Bernard dePassemar

Specializes in the development and marketing of technology, the protection of innovation, and international negotiations with reference to categories 12 and 20.

Patadmin CC
Alan J. S. Dunlop

Specializes in technology transfer of fuel technology, fuel from coal, organic chemistry, biological processes, mining and geological technologies, mechanical engineering, electrical and electronic engineering, process engineering, chemical engineering, fuel technology, industrial plant erection and enterprise founding, inorganic chemistry, minerals beneficiation especially platinum metals group, industrial plant and processes and organic chemistry, biological inventions.

Patco S.A.
C. Bugnon Hays

Specializes in technology transfer for small and medium size entities relative to categories 1, 15, 19 and 20.

Pax Technology Transfer Limited
John D. Emanuel

An independent organization with associates world wide, which provides international technology transfer agency and consulting services to industrial and institutional clients that specialize in searches for medium/high technology based business opportunities throughout the industrialized world, and also in licensing out selected industrial technologies with experience in mergers/acquisition service and assistance in company start-ups for mechanical and process engineering, chemistry, biochemistry, telecommunications, energy, medical disposables, medical electronics and other industrial products and processes.

PCT Technical Services, Inc.
Joseph P. Ciarimboli

Represents venture capitalists and executive entrepreneurs seeking new business opportunities through technology licensing programs specializing in consumer markets and in technical disciplines of pyrolization, waste-to-energy and new technical or market developments with coal products.

P-E Consulting Services Ltd.
Piers Harley

Specializes in new business and product development for UK and overseas corporate and government clients with significant experience across many industrial products and processes but with specialisms in electronics, instrumentation, information technologies and production plant and machinery. Categories 1, 7, 10, 15, 18, 19, 20, 21, and 24.

Pereles & Associates
Edward A. Pereles

Specializes in technology transfer related to categories 14, 24, 26 and 27 for small business, colleges and universities.

PharmaSci International, Inc.
Eldon D. Nielson, Ph.D.

Specializes in pharmaceutical and biotechnology licensing, in and out, domestic and foreign for pharmaceutical and biotechnology companies with experience in providing scientific evaluations of FDA submissions, original or generic, and representation of clients at the FDA.

H. J. Rantzen & Company
John Rantzen

Specializes in licensing in and out of Australia intellectual property rights for individuals and corporations, in all areas of technology excluding organic chemistry and pharmaceuticals.

R. Gale Rhodes, Jr.
R. Gale Rhodes, Jr.

Specializes in technology transfer relating to joint prostheses -- hip joint prostheses, knee joint prostheses, shoulder joint prostheses, ankle joint prostheses, and related orthopaedic devices and in obtaining of FDA approval for orthopaedic devices to enhance their value on transfer.

Irving D. Ross Jr. & Associates
Irving D. Ross Jr.

Specializes in technology evaluation, analysis & search with ability to assist in engineering, business and legal requirements.

Derek Rowlands Technology Transfer
Derek Rowlands

Specialist in plastics and rubber industries and related industries for which products from these materials are manufactured e.g. construction, packaging, engineering and etc. with experience in setting up worldwide marketing and distribution of products prior/after their licensing - especially in Europe and USA.

Royal Netherlands Industries Fair
G.M. Foet

Specializes in organizing of "Tech Transfer" exhibitions.

Rene Royon
Rene Royon

Consultant to large/small companies and individuals (research or partners/opportunities - preparation/ negotiations of agreements...) for plant patents, plant breeders' rights, horticulture, seed industry, plant biotechnology with other interests in categories 1, 21, 22 and 24.

Saskatchewan Economic Development and Trade
Lorne Bryden

Specializes as a liaison service between owners and users of technology with interest in encouraging local investors/businesses to expand by taking advantage of the best technology available in their field of endeavor.

Walter E. Schmidt, Esq.
Walter E. Schmidt, Esq.

Specializes in consulting firms developing expert software systems, especially law-related software applications packages, providing practical and legal advice in the protection and licensing of complex software systems of technology category 18.

Shackson Associates Inc.
Richard H. Shackson

Specializes in structured searches to identify dormant or underutilized technologies, and prepare technical evaluations, market assessments and commercialization plans with the ability to also provide in-house development services and seed capital, and assist in transfer or new venture startup with emphasis on agricultural, medical and manufacturing systems.

Shannon Development Co. Ltd.
James A. Dolan

Specializes in acquiring technology for manufacturer of products by Irish firms with regard to categories 1, 14, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26 and 27.

Shekell Mooring International Licensing
David G. Moorine

Specializes in technology transfer where there is a real opportunity in Europe by working with established European client companies whose areas of interest are extensive and cover most industrial and consumer areas.

Joseph P. Shlegeris
Joseph P. Schlegeris

Specializes in the licensing-out of new technology and the formation and financing of new technology-based ventures having expertise in medical products, products for the handicapped, chemicals, computer software, and consumer products.

Small Business Institute
John L. Ewing-Smith

Specializing in management and technological advising of small business in chemical, food and mechanical products fields. Domestic and international with emphasis on European and North American companies especially interested in technology categories 1, 12 and 13.

Technical Evaluation and Management Systems, Inc.
Floyd E. Leaders, Jr.

Specializes in providing support services and product definition in two categories 14 and 26 by working with a wide variety of small to very large pharmaceutical and service companies to obtain marketing approval for these items.

Techni Research Associates Inc.
Dr. Louis F. Schiffman

Technology brokers licensing In and Out, joint ventures and acquisitions in all technical areas of interest with particular focus on chemical, chemical specialties and allied process industries including coatings, adhesives, food, pulp and paper, pharmaceuticals, medical, health care products, etc. Publishers of biomonthly periodical WORLD TECHNOLOGY/Patent Licensing Gazette (since 1968); also "Annual Guide to Available Technologies."

Technoconsult
H.J. Sluiter

Technology management consulting in innovation, technology transfer and technology auditing and feasibility studies for small and medium sized firms.

Technolizenz
Kurt F. Buchel

Consultants in technology transfer, with experience in the searching, selection & motivation of projects; the evaluation of the patent situation, where applicable; negotiating, drafting and editing of contracts; supervising the start-up phase, and providing a quick evaluation of the market potential around the globe.

Technology International Exchange, Europe
Martin Jones

Specializes in transfer of technology of categories 5, 7, 11, 12, 14, 17, 18, 19, 20, 24 and 27.

Technova-Tec'l
Robichon Jacques

Consultant or Broker offering most services related to technology transfer and information, i.e. technology brokerage, search and negotiation with partners, technology auditing/evaluation, diversification studies and search for opportunities, technology awareness and state-of-the-art studies and joint venturing and industrial/commercial cooperation schemes.

Tectrans Tokyo Corporation
Tog, Heiji

Specializing in technology transfer of factory automation system, CAD/CAM and related equipment; export and joint R&D arrangement for application, of super high purity iron; shiprepair management system with mini-computer; soil, cement and concrete testing machine & apparatus; and dolomite foliage spray.

Techtran
Robert L. Bixler

Specializing in licensing of gas processing technology, geothermal pollution control with expertise in commercial development and joint venture/development programs.

Tectran International
A. Terry Brix

Specializing in working with large companies in Japan and Europe, and small-and medium sized companies in the U.S. in categories 1, 2, 3, 11, 12, 13, 14, 17, 18, 19, 24, 25, 26 and 27.

Tenneco Canada Inc.
R.A.F. Latham

Specializes in technology transfer of chemical systems for bleaching of pulp, water treatment systems and electro chemical systems.

TIP Technologies, Innovations, Patents
Klaus Hübner

Actively engaged in new product search on behalf of mostly German industrial companies with especial interest in plastics; metals; drugs; electrical and electronic equipment; mechanical machinery and equipment; transportation and lifting equipment; energy; pollution control; medical, surgical and dental instruments; biotechnology.

Transglobe Ltd.
G.N. Kaegi

Specializing in technology transfer of food processing/food technology; electric household appliances and medical instruments and appliances.

Transmission Systems Limited
Derek Bernard

Specializes in identification and selection of embryo innovative projects with apparent patentability and com-

World Business Publications Ltd.
Lawrence Cooklin

Specializing in publishing the technology transfer international, a monthly newsletter reporting on new licensing opportunities.

Wray & Associates
Errol Harwood

Specializing in providing a range of services in filing, prosecuting, maintaining, licensing and enforcing patents, trade marks and designs within Australia and overseas.

Max L. Wymore PC
Max L. Wymore

Specializing in technology transfer of low temperature ceramic curing and densification, thermal barriers, coatings for glass and ceramic and paint to waterproof, cleaning compositions and emulsifiers.

Shusaku Yamamoto Patent Office
Sbusaku Yamamoto

Specializing in transfer of technology for a new plastic molding technology, especially injection molded products having scratch-resistance surface with especial emphasis also on headlight lens and sunglasses.

Joanna A. Zaremba
Joanna A. Zaremba

Specializes in transfer of technology to Europe and from Europe to USA.

Notes

Notes

Notes

mercial potential with experience in joint venture arrangements with inventors involving whole or partial project funding and management in categories 15, 19, 20, 21, 26 plus those in exercise machines, air weapons, hardware and tools, furniture, board games.

Trans Tech Services USA
William B. Miller

Offers professional international business planning services for small and medium-sized US mfg firms seeking to establish new positions or expand existing positions in the int'l market. Stressing licensing and joint venturing as "aggressive alternatives" complementing direct export and assists companies to move into these areas and offering a "technology opportunity search" service for overseas clients seeking US associates for licensing or J/V in the US or abroad.

Tsukishima Kikai Co., Ltd.
Yukio Hayafune

Specializes in technology transfer in categories 1, 5, 12 (especially purification) and 27.

Tuttle International
Thomas F. Tuttle

Specialized in assisting enterprises in their first efforts to weigh the values of licensing and to manage the licensing decisions and transfer, with emphasis on categories 9, 20 and 23.

University Patents Inc.
David N. Koffsky

Specializes in representing a number of large research-oriented universities and managing their patent-relating functions.

Tino van der Zeyde
Tino van der Zeyde

Specializes in transfer of technology of categories 5,6,7 and 12, including coal liquifaction by providing assistance to licensors/-ees in shaping and materializing projects.

J.Vann & Associates
John D. Vander-Velde

Specializes in assisting companies on a consulting basis, mainly within the electronics industry within Australia with emphasis on developing new markets with export potential by providing marketing, business planning, venture capital, joint ventures, sales training, and strategic planning services.

Maurice Vaucher
Maurice Vaucher

Major activity is to work as a part time executive for small sized companies which do not have an international department, when such companies have suddenly to face an international problem such as: technology transfer, agreement negotiation, incorporation of a foreign subsidiary, discussions on litigation case, opening of a new market for their products.

Venturecorp Investments Limited
Owen McShane

Specializes in licensing and joint venture opportunities for our client companies which are spread across a wide range of sectors and technologies.

Venture Insights Group
Dr. B. Woody Friedlander

Undertakes licensing project work and in-house licensing courses and provides business and strategic planning services with experience in negotiation and structuring licensing deals, joint ventures, start-ups.

Viable Technology Transfer Limited
Paul M. Jacobson

Specializes in low technology developments for improvements to existing mechanical machinery and equipment by assessing and managing new low technology developments through pre-commercial phases.

W A Product Innovation Centre Pty Ltd
Dr. Peter J. Dallimore

Provides assistance in the early stages of commercialization of inventions and innovations with a full range of services ranging from invention assessment, product development, market research to business plan preparation.

WIL, Inc.
Clyde W. La Grone

Specializes in transfer of technology of improved mining processes & energy efficiency and cogeneration & fuel cell processes & equipment plus categories 23 and 24.

Edward P. Winters Associates Ltd.
Dr. Edward P. Winters

Specializes in transfer of technology for pharmaceuticals, devices, diagnostics, cosmetics and toiletries, hospital instruments & devices and instruments related to health care.

Ray E. Snyder
Ray E. Snyder

Specializes in representing universities with inventions that evolve from their research over a broad spectrum, particular emphasis on life sciences and energy related inventions.

Sofad, S.A.
R. Recondo

Specializes in international technology transfer, new products and partners' search, mergers, acquisitions and companies' rapprochement for industrial and management aspects of transactions with expertise in industrial innovation and/or diversification through licensing in; and joint venture; technology appraisal for outward licensing.

South African Inventions Development Corporation
A.A. de Waal

Specializes in offering inventions arising from research in South Africa with a main source of technology being research institutions, government agencies, industry and universities, and private inventions. SAIDCOR assists with the commercial development of the technology and where applicable, secures protection by patenting.

John Spreadhorough & Company Ltd.
John Spreadborough

Specializes in transfer of all categories of technology by licensing-in (mainly for British companies) and licensing-out (world-wide).

William A. Stickel
William A. Stickel

Consultant in Technology Assessment and Licensing. Business management of technological assets, including sourcing, assessment, acquisition, and sales of technology. Experience in establishing contacts and negotiation with domestic and international organizations for the transfer of technology, cooperative development programs, and joint ventures.

Dr. Iur. Bruno Stocker
Bruno Stocker

Specializes in the realization of innovation projects and rendering various services according to the progress of a project for technology categories 1, 4, 5, 7, 9, 15, 16, 19, 20, 21, 23, 24 and 26.

Strategic Business Development Services/International
Richard J. Marsh

Specializes in providing growth services to organizations in the USA and Overseas for problem identification/solution criteria; decision-making options/scenario-building; strategy formation; "information-bundling" to facilitate management action; product/market development: idea generation/technology application; concept refinement; and marketing implementation/distribution alternatives.

Strategic Management of Innovation Limited
Timothy C. Wood

Specializing in technology management by developing projects into financeable businesses, advertising on the stimulation and management of innovation in larger companies and composing entrepreneurial teams who assist in obtaining finance and tailor training to individual companies' needs.

Strategy Management Associates
William P. Chandler

Specializing in providing international services in technology transfer of raw materials, electronic components & photovoltaics and technology evaluations; strategy and formulation and capitalizing on these via commercialization or marketing through adept licensing-out of patents/trade secrets.

Dudley B. Smith
Dudley B. Smith

Specializes in offering instruction on technology transfer issues or fundamentals world-wide and consultation on specific technology transfer projects.

Steeple Hill Consultancy Services Ltd.
J.E. Geach

Specializes in providing all kinds of technical and commercial consultancy services, including licensing, primarily to the chemicals industry throughout Europe for chemical and polymer manufacturing and conversion companies wishing to offer technology and seeking technology and know-how.

Techne Associates
Dr. Roy H.W. Johnston, Paul Davies

Specializes in technology transfer in categories 1, 18, 19, 22, 23, 24 and 27 between small high tech firms in fringe developing areas of the European Community, e.g. Ireland, Scotland, Wales, Brittany.

Phillips International
Eugene F. Phillips

Specializes in technology transfer of plastic fabrication technology (both in and out) having ability to structure, coordinate, evaluate and negotiate ventures, acquisitions or licensing with background in plastic packaging related to blow molding, injection molding, thermoforming, etc., theory, processing, machinery, equipment and products.

Keith Phillips & Associates
Dr. K. C. Phillips

Technical consultancy to the food industry, specializing in sweeteners.

William F. Pinsak & Associates
W. F. Pinsak

Assistance in the evaluation of tech portfolios, optimum methods of exploitation and suitability of licensee/licensor/partner with experience in the movement of goods and materials through international commerce, including matters of taxation, customs and duty, mergers, acquisitions and ventures on every continent for categories 15 and 18-26.

Roland Plottel
R. Plottel

Specializes in technology transfer of patents and technology of semiconductor devices (including integrated circuits, semiconductor materials, and processes and methods of their manufacture); of optical transmission (fiber optics and their manufacture); of cable video transmission and television with interest also in both licensing in and licensing out in the field of optical memories, photovoltaic cells, and electric storage batteries and licensing out in the fields of electrophoresis primarily for medical and laboratory applications.

Polyresearch Service B.V.
Mrs. W. van der Voorde

Specializes in technology evaluation and management of all categories providing indirect innovation counselling by permanent patent watch, i.e., monitoring of new patent documents in all fields of technology published in the more important industrial countries and selective dissemination of the information retrieved in this way.

PPS Polyvalent Patent Services Ltd.
A. J. Frauenknecht

Specialized in invention management with diversification, including patents, trademarks and licensing with clients in: food processing and biotechnology (university and manufacturer), computer hard- and software (R&D and distributors), mechanical machinery and equipment (manufacturer), laser and plasma arc technology for cutting and welding (R&D and manufacturer), gate-array design and manufacturing by laser for inhouse design and processing (institutes and licensor). Tech transfer, both in and out in categories 1, 3, 18, 19, 20, 21, 22, 23, 24, 25, 26 and 27.

Proconsult
Ing. Klaus Ohletz

Specializes in technology transfer of categories 19, 20 and 21.

Product Search & Development Ltd.
K. M. Blauhorn

Specializes in identification of suitable licensees and licensors, advising on diversification, product searches, negotiation, agency and joint venture agreements and drafting of agreements with special expertise in categories 19, 20, 20-24 and equipment concerned with energy conservation.

Project Commercialization Group, Inc.
Hugh R. James

Specializes in technology transfer of agricultural and other chemicals manufacturing and utilization, energy processes, and manufacturing technologies for clients in Europe, North America, Japan, and Korea to find and commercialize new technologies and to promote and finance technologies into new market areas.

Rain Hill Group, Inc.
Richard A. Cawley

Specializes in searching internationally for technology based business opportunities to evaluate and present to our clients who will assist in the furtherance of technology by sponsoring research, licensing, joint venturing, providing financing or any other arrangements of mutual agreement between the principals.

Rakan Consulting Ltd.
Eduard Siegenthaler

Specializes in technology categories 1, 2, 3, 5, 6, 13, 16, 17, 20 and 26 by providing license consultancy, establishment/administration of license/patent/invoicing companies and marketing of licenses.

Modiano & Associati s.v.l.
Dr. Guido Modiano

Consultants for all areas of technologies with medium size clients.

Mohawk Research Corp.
M.L. Rorke

Specializes in research and evaluations in the areas of innovation, technology commercialization, licensing, venturing and financing innovation.

Muir & Associates
Robert F. Muir

Specializes in linking technology and enterprise by commercialization of intellectual properties through licensing or joint venture with expertise in technology transfer of chemical, mechanical, medical, process and software technologies.

Murray Associates, Inc.
Charles K. Murray

Specializes in marketing and sourcing technology in all categories worldwide through associated offices in Europe, South Africa, the Pacific Area - including one in Beijing, PRC.

M&W Consultants
Marcel E. Mussard

Specializes in industrial innovation, market research, marketing, know-how transfer, joint ventures, set up of new production facilities, venture capital investments having experience in management of high-tech projects, particularly in such fields as micromechanical, electromechanical and electronic devices, sensors, instrumentation, control systems, microelectronics, data processing equipment, telecommunication, medical electronics, materials.

James J. Nawrocki
James Nawrocki

Consultant specializing in the analysis of financial information related to Intellectual Properties. Development of financial models for the economic analysis necessitated by licensing, litigation, or valuations of company assets.

D.J. Neil Limited
David Neil

Specializing in marketing and financial aspects of technology transfer inward and outward. Multidimensional modelling of existing activities as basis for product searches. Marketing strategy formulation. Questing. Market research. Financial assessment of partners. Valuation of licenses. Financial appraisal of licensing projects, joint ventures and acquisitions. Business plans. Negotiation. Clients in energy, heavy fabrication, process engineering, instrumentation, diagnostic equipment, pharmaceuticals, enzymes, food, ceramics. All categories of interest.

Nino Bergamini Associates
Carlo Piscicelli-Taeggi

Active in category 14: Drugs & Medicines. Areas: Europe, Japan, USA. Specialized in search & selection of: Products on license for Italy; licenses abroad for Italian-developed products; Italian-developed products for areas indicated. Also preclinical studies, clinical pharmacology, clinical development, biomedical data processing software, medical congresses & meetings.

Noone Associates
Dr. Thomas M. Noone

International business development consultants providing services in: market research; technology assessment; business opportunities evaluation; business plan development and assessment; strategic planning and implementation; integration of technology management and market development; technology transfer to or from U.K., U.S.A., Europe, Japan; new ventures; venture capital presentations; competitive analysis; profit improvement programs; mergers and acquisitions; finding and negotiating with joint venture partners. Special interest in categories 1-5, 7, 12-17, 26 and 27.

Notarbartolo & Gervasi S.r.l.
Dr. Gemma Gervasi

Specializes in transfer of technology of categories 1, 2, 3, 4, 5, 6, 7, 11, 12, 13, 14, 15, 16, 17,23, 24, 25, 26, and 27.

Norwegian Industry and Technology Office
Christian H. Arentz

Specializes in the promotion of people's exchange, joint ventures, licensing agreements, investments, R&D partnerships, etc., in USA and Norway in all technology categories between industrial companies in Norway and companies, universities and research institutions in USA.

Kew Associates, Inc.
Edward P. White

Areas of competence: licensing, joint venture; corporate acquistion also new product and technology acquisition; contract negotiation; tech transfer; tech evaluation; mgt of industrial property rights; foreign market analysis. Categories of interest and familiarity: 4, 8-13, 15, 17, 20, 21, 24-28 (agriculture and agro equipment).

Richard G. Kinney
Richard G. Kinney

Specializes in electronics and computer-related technology.

Kiser Research Inc.
John W. Kiser

Specializes in offering new technology from Eastern Europe and the Soviet Union in categories 5, 9, 11, 12, 13, 14, 17, 26 and 27.

K.O.B.
J.M. Dopchie

Specializes in representing small or middle sized enterprises desiring to transfer technology with especial interests in categories 1, 2, 5 and 20.

Rudolf Kuhlmann
Rudolf Kuhlmann

Specializes in technology transfer of instruments and controls.

Laff, Whitesel, Conte & Saret
J.W. Whitesel

Represents clients active in all technical areas primarily electronics, foods, and personal hygiene products and categories 1, 5, 13, 14, 18, 19, 20, 21, 22, 24 and 26.

Lagus & Co Ky
Henrik Lagus

Consulting in licensing and technology transfer.

Lambrecht Industrial Consultants
J. Lambrecht

Specializing in technology categories 20, 21, 22, 23 and 27, by assisting industrial companies in all matters related to international in- and out-licensing.

Laughlin & Markensohn
Richard T. Laughlin

Represents both companies and individuals in the medical field; general and specific software for computers; food products; industrial chemicals and processing; agricultural chemicals; specialized hard metal tubing; corrosive resistant coating; mechanical measuring; conveying and weighing equipment.

Lee & Ko
Duk Yeul Baek

Specializes in technology categories 11, 12, 14, 18, 19 and 20 and represent these types of clients.

Leifield Inc.
Robert F. Leifield

Specializes in representing chemical manufacturers with emphasis on drug chemicals and specialty chemicals in licensing activities, specialty monomers, plastics additives, alkaloids & derivatives, fluoroorganics, catalysts, electronic chemicals, analytical & biotechnology reagents of special interest.

James C. Logomasini
James C. Logomasini

Specializes in technology transfer of chemical and mechanical technologies.

Lomar Associates
J. Lou Eckebrecht

Represents clients in cooperation with associates licensing, consumer, industrial, etc. Products, processes, technologies, know-how, and conducts searches and publishing a bulletin of offers and search requirements from clients of Lomar & Associates and selected others.

Dr. Werther Lusuardi
Dr. Werther Lusuardi

Represents various multinational companies and universities seeking industrial property, licensing and tax advice by a program that includes patent auditing, organization and coordination of industrial patent departments with especial interest in biotech, medical instruments/products, dental materials, orthopedics, implants and organic chemistry.

Ingenieurburo Schaaschmidt
Dieter H. Schaarschmidt

Firm represents medium sized and large companies, universities and individual inventors. It also helps foreign companies and inventors acquire technology, Joint Ventures, etc. from West Germany and vice versa.

Innovagent
Dr. Bela Kende and Dr. Adam Szentpeteri

A consultancy offering technology and seeking representation for license proposals towards Hungary in the technology categories 2, 8, 9, 10, 14, 19, 22, 24, 26 and 27.

Innovation Centre of NSW
Harold Graycar

We specialize in representing ordinary inventors (non-corporate) and small companies having technology in categories 18-28.

Innovation 128 - Techtrade International
Marc-Henri Menard

International company specialized in information and communication in the field of innovation and technology transfer. Committed by more than 200 international companies and research centres for technology marketing and/or searching. Also publishes multi-client studies in emerging technologies. Runs an electronic journal of technology - related informations.

Institute for Industrial Research and Standards
Noel McCarthy

Provides a technology acquisition and product searching service for Irish industrial companies who have identified the parameters of the products or technologies they require in order to develop their business having four specialists operating in the areas of processed foods, electronics/communications, engineering and health care/pharmaceuticals.

Intercontinental Enterprises Limited
Gordon S. Riess

Assists companies which are establishing or expanding international operations to identify and negotiate with licensees, distributors, and joint venture partners, and to acquire products or technology regarding medical equipment, computer, high-tech engineering, and similar client companies, through offices in Europe, Asia and North America.

Interlicon Ltd.
J. T. Wenham

Consultancy service to companies and individuals mainly concerned with the licensing out of technology in category 5 having world-wide experience in negotiation of contracts and monitoring of subsequent royalty payments.

International Legal Counsel Sprl
Thomas B. Trumpy

Specializes in protection and licensing of software and in evolution of economic, legal and technical aspects of energy and fuel cycle.

The International Licensing Network, Ltd
Robert Goldscheider

Consults on the discipline of technology transfer in and out, rather than specializing in any particular industries having recognized experts in all major scientific disciplines to provide advice and specific industry contacts. Active relationships with licensing associates, located in the important markets around the world, all of whom are prominent in their respective countries.

International Technology Marketing
Edward G. Tutle

Specializing in high-technology areas in electronics/electrical, mechanical, optical, and computer disciplines, with extensive experience in U.S. and overseas technology transfer, products development/modification for foreign markets leading to successful product introduction and manufacture having experience with international laws/norms, U.S. export controls for commercial/military (Dual Use) technologies, U.S./Foreign government procurement, commercial, financial, customs practices related to technology transfer and product marketing.

IPC Intellectual Property Consultants
Dr. E. Wilms

Specialized in all matters relating industrial and intellectual property.

Intertech Inc.
David A. Iydaloff

Represent American and European manufacturers licensing to South America and Far Eastern manufacturers, handling negotiations and contracts.

Evolut Enterprises Ltd.
Anthony Etele

Technology transfer consultant and broker in computers and software; electrical and electronic equipment (household appliances, security, emergency and warning alarms).

Alexandra Frei
Alexandra Frei

Specializes in the field of creation and fabrication of high tech-equipment, especially for detecting gases based on infrared spectroscopy or the gas sensitivity of semiconductors. Microelectronics and microoptics are involved especially in sensing gases which are present in the atmosphere (air pollution) or which are produced by chemical reactions (biosensor) using sensing devices based on infrared absorption (photoacoustic spectroscopy), on the gas sensitivity of metal oxide semiconductors or on optical microstructures (infrared interferometry).

David J. French
David J. French

Specializes in assisting licensing consultants

Dr. Fernando L. Flisi
Dr. Fernando L. Flisi

Provides technology transfer for categories 2, 16, 25 and 28 by licensing - out above consumer goods under major trademarks to manufacturers within U.S.A., Canada, Japan, Korea, Mexico, Argentina, South Africa, Israel and Turkey.

Bureau Frontenac
Michel Vaudelay

Broker of new technologies principally for launching of new products and processes, search for licensees and negotiation of agreements with experience in categories 1, 13, 22 and 27.

Garcia Cabrerizo
Francisco Garcia Cabrerizo

Specialize in technology transfer advice and counselling.

Francois W. Gasser
Francois W. Gasser

Broker for all technology categories; in and out, Europe, North and South America, Middle East, Far East, Australia, Africa representing small and medium sized companies as well as individual inventors.

Bureau Gevers
John Debetencourt

Specialized in technology transfer relative to categories 8, 9, 18 and 21 with especial interests for concrete proceses, concrete pumps and fire proof products.

Lester M. Glantz
L. M. Glantz

Technology assessment, technology transfer IN and OUT, new products search and acquisition, R&D, management consulting. Activities cover broad range of products, including communication and control, medical, dental, surgical, biotech and electronics.

Gomov
Dr. H. Dehbraut

Specializes in helping companies in the region in their innovation and technology transfer projects by acting as a representative in finding partners for another's project using such means as fairs, publications, mailings, etc.

GWK
K. Arnegger

Aim is to assist small and medium sized industries in obtaining access to the world markets for their products and to get new technologies and products for their markets with specialty in technology transfer, market research and sales promotion in Austria, Munich (headquarter), Poland, Hungary, Hong Kong, India, Indonesia, Malaysia, Pakistan, Singapore, Thailand and Taiwan.

John L. Hayes Pty. Ltd.
John L. Hayes

Independent Consultant with specialist experience in Australian and International copyright areas; media and communications; and Government liaison.

HealthEcon
Mrs. Karin Buechner

Representative for Pharmaceutical/Chemical Industry Health Care Authorities and Professional Associations/Health Care.

B. Hedberg International A.B.
Bertil Hedberg

Represent manufacturing companies who license their technologies within defined market plan.

and development and especially those clients requiring new products or having products to license or joint venture.

Chemtex, Inc.
Allen V. Muska

Specialze in technology transfer related to the design and construction of synthetic fibers, petrochemicals, plastics and petroleum refinery plants worldwide with strong presence in Asia (India) and Peoples Republic of China.

Annibale Chiappi
Annibale Chiappi

Specialize in implementation of technology transfer projects concerning: electrical equipment, food and processing, mechanical machinery and equipment, and packaging, graphics and printing, with experience in reorganizing technology transfer operations or in organizing for entry into such activity.

CJN Associates
Chris Noonan

Provide consultancy services to licensors and licensees of both capital and consumer goods, particularly in structuring negotiations and agreements. International marketing consultancy extends to franchising business formats and trade names.

Dr. Shlomo Cohen & Company
Dr. Shlomo Cohen

Specializing in protection, commercialization of industrial and intellectual property.

Colorado Research Development Corporation
Cynthia J. Hanson

Specialize in the transfer of technology by the development and commercialization of intellectual properties developed by CRDC researchers through licensing activities, R&D limited partnerships, joint ventures, and new business startups, who are especially interested in seeking industrial commercialization support in the areas of supercomputer software development, biotechnology, materials sciences, global sciences, and health and educational services.

Avv. Paolo Emilio Comandini
Paolo Emilio Comandini

Consultant and assistant concerning patent and license questions and affairs.

CTC & Associates, Inc.
Charles F. Blaich

Specialize in consumer orientated products such as automotive accessories, tools, gifts and novelties, sports equipment, toys and household/garden accessories having associates in Europe and Japan with especial emphasis on advising about intellectual property protection, commercial development, licensing and business development.

C. W. Nofsinger Company, The
Rowland L. Nofsinger and Bernard J. Duffy, Jr.

Specialize in technology transfer related to category No. 12 and especially the CCCC crystallization process owned by Tsukishima Kikai Company Ltd. of Japan, for making pure product by countercurrent crystallization.

Data Securities International, Inc.
Liliane Choney

Specializes in services for protecting third-party computer technology: technology escrow, technical verification, consulting, management liaison with procurement, QA, legal, marketing, and customer or technical support with especial interests in the technology of category No. 18.

Dawn Canada
Gopal Krishnan

Specializes in licensing/joint venture projects for public and private sector clients in India whose interests include mechanical machinery--machine tools, manufacturing euqipment, oilfield; Hi Tech--communications, computers, CAD/CAM; alternate energy; coal gassification; coal transport; water pollution; medical instruments.

Martinez de Onate
Dr. I. Martinez

Specialize in technology of categories 4, 7, 19, 20 and 24 with especial emphasis on technology management, licensing (preparation and negotiation) and consultation.

Despins Glass & Rees
David A. Glass

Specialize in technology transfer for Canadian original equipment manufacturers of oilfield drilling and service equipment and manufacturers of plastic packaging (bottles) used to distribute (1) engine oils, antifreeze and other chemicals and (2) food products.

Australian Trade Commission
Don Houston

The Australian Trade Commission is responsible for promoting the export of Australian-developed technology, embracing all fields of industry, agriculture, mining and the services sector. The Commission will be pleased to provide information on available technology in any particular field of interest to overseas engineers from Canberra or through any Australian Trade Commission abroad - these are located in all major markets.

Avery Business Development Services
Henry Avery

Speciality is identifying clients who have needs for patented, proprietary products or processes in the plastics, coatings and ogranic chemicals areas.

Bally International Ltd.
Werner Burgin

Specialize in technology transfer related to footwear and leather products, accessories, adhesives and chemicals for related industries.

Stephen S. Barone
Stephen S. Barone

Specialize in management consultation and as negotiator for United States and European manufacturing companies interested in acquiring or releasing technology with thirty years' experience as an executive with responsibility for world-wide licensing operations.

Barclays Techmart
Helen Lord

The UK marketplace for technology transfer.

Bard, Dr. B.
Dr. Basil Bard

Specialize in negotiating license agreements and the expert interpretation of such agreements as well as on process or product development and opportunities for their exploitation with clients from all sections of industry.

Berman - Consultores en Ciencias Economicas
Josue Isaac Berman

Business development services. Search and evaluation of potential licensees, licensors or partners. Joint ventures and commercial cooperation proposals. Foreign investments. Market research. Feasibility studies. Taxes and currency exchange control. Mergers, acquisitions and divestitures. Performance auditing of contracts.

Bethlehem International Engineering Corporation
Richard L. Wechsler

BIEC specializes in technology transfer directly or indirectly related to the steel industry such as coal and mineral mining, cokemaking, iron- and steel-making and steel finishing, as well as related areas of chemicals, pollution control and coatings of metal or paint with experience in patent, know-how and trademark licensing and related consulting services.

Charles A. Bevelacqua
Charles A. Bevelacqua

Specialize in industrial and technical corporations in the United States and Japan who wish to find licensees, licensors or joint venture partners with extensive experience and professional contacts with Japanese industrial concerns, seeking licenses in "high technology" (novel technology) areas. Our general areas of interest are in "Technology Categories" 17 through 26.

Bier Group Ltd.
K. Carter

State trading organizations in Eastern Europe and major companies world-wide who have something new and interesting for which they wish us to find them licensees or who are seeking projects for them to manufacture and market under license in categories 5, 6, 7, 9, 10-12, 17, 19-24, 27.

G. Bloch
Gerard Bloch

Specialty is in negotiating patent and license agreements and preparation of contracts in technology categories 2, 8, 15, 19, 20, 24, 25, 26 for engineering firms and manufacturers.

Blue, E. M., & Associates, Inc.
E. Morse Blue

Consulting Chemical Engineer, specializing in petroleum and petrochemical processes. Clients include engineering companies and environmental protection agencies.

Boliden WP-Contech AB
Jan-Erik Nelleus

Specialize in technology transfer in categories 9, 10, and 11 with especial emphasis on offering metals smelting and refining; mining and minerals extraction, specially cut and fill mining, base metals and complex minerals

others including marine technology, remote sensing, medical instrumentation, pharmacology and energy.

University College Galway Ireland
Dr. J. Watson

University College Galway has particular expertise in Marine Research especially Mariculture of Oysters, Mussels and Salmonids; Computer Integrated Manufacturing techniques applied to Production activity control and to the use of Robots in assembly work, expert systems applications, to e.g. analysis of offshore drilling rigs; Renewable Energy Systems Design; Instrumentation development particularly for Biotechnology applications and Immunodiagnostic Applications of Biotechnology.

University College Cork
Tony Weaver

Offers technology in categories 1, 17, 18, 19, 22, 24, 27 and especially Microelectronics - GaAs, Silicon Microfabrication, CO2 Pumped Lasers, Catalysis, Electrochemical Activity of Thin Films at Metal Surfaces, Nitrogen Fixation and Biological Crop Enhancement, Monoclonal Antibodies and Virology, Aquaculture and Coastal and Offshore Engineering.

University of Utah Office of Technology Transfer
J. Winslow Young

Offers technology in categories 10, 11, 12, 14, 18, 23, 26, and 27.

Vrüe Universiteit
L. Titeca

Interested in technology related to material sciences, micro electronics, image processing, information technology, artificial intelligence, high energy physics, wind energy, flow simulation, energy management, electrical vehicles, molecular biology, biotechnology, food & agro technology, organic chemistry, medical technology, cyclotron, nuclear medicine, pharmacy, biomedical engineering and oceanography.

Wake Forest University
Paul G. Waugaman

The University has research interest and expertise in the following broad areas: medical imaging, radiology, ultrasound, MRI, cancer drug development and testing, monoclonal antibody development, immunology (clincial and basic), rapid screening tests (clinical chemistry), Blood lipid (chemistry and physiology), paricitic disease diagnosis and treatment, plant growth regulation, nerve receptor chemistry, laser-assisted metals deposition, microstructural and research for materials, micro organisms, tissues.

University of Warwick
K. Deutsch

Offering technology of categories 8, 18, 21 and 27 especially special ceramics for filters, cutting tools, heat barriers, and in strong glasses, all areas of engineering systems and systems simulation and surface chemistry.

Waterloo Centre for Process Develment
E. B. Cross

Offering technology related to categories 9, 18, 23, and 27 especially zinc roasting and cyanide recycle from gold mills, computer aided process control, SO2 removal and improved clarifier design and single cell protein from waste cellulose.

Wisconsin, University of
Randall Olson

Our University program acts as a liasion between private independent inventors and existing Wisconsin manufacturers. Both manufacturers and inventors have expertise in a wide variety of areas. We are constantly seeking commercially viable ideas to link with Wisconsin companies.

Wisconsin Research Foundation, Medical College of
Donald H. Westermann

Consistent with all academic institutions, we constantly elicit both research support and cooperative research effort with the private sector in all areas of medical practice, both clinically and at the basic science level. We offer technology in categories 19, 26, and 27 especially with regard to NMR and ESR technology and cell culture and diagnosis.

Mayo Medical Ventures
Rick F. Colvin

Cooperative research and technology transfer in the technologies of categories 14 and 26 especially.

Memorial Sloan-Kettering Cancer Center
Carolyn McGinnis

Memorial Sloan-Kettering Cancer Center offers broad opportunities for scientific collaboration and licensing in fundamental and applied biomedical research. Biological and clinical studies range from the regulation of gene function to the development of new short-lived radionucleocides. The Center has developed and evaluated new methods to treat different forms of cancer, immunodeficiencies, disorders and complications of cancer such as infectious diseases, respiratory, and neurological disorders etc. Research has resulted in the development of new chemotherapy agents and medical devices, some of which are currently in clinical trials.

North Carolina State University
Becky R. French

In addition to licensing out technology exclusively developed at North Carolina State University, we are interested in licensing arrangements or joint partnerships to develop these products or processes with an outside company with a special interest in categories 1, 2, 4, 7, 8, 11, 12, 13, 18, 19, 20, 22, 23, and 27.

Northeastern University
Richard J. McNeil, Jr.

Technology interests include: New Products; Analytical Release Tags; Derivatives of T2 Toxin; Stabilization of coal liquid fractions and other fuels; Cold-hearth melt spinning apparatus; Method and Apparatus for rapid solidification processing at multiphase alloys; Precipitate Hardened Titanium Alloy and Method of Manufacture; and testing distribution cable for safe grounding.

Northwestern University
Martin Rachmeler or Teri Willey

Seeks outside funding or licensing in many areas of interest. Selected specialties include materials (metals and ceramics), chemical catalysis, lasers, medical instrumentation (diagnostic or surgical), medical agents (drugs, immunological preparations), cancer detection and therapy, reproduction research, neuroscience studies including areas of congnition and speech pathology, and rehabilitation engineering.

Norwegian Institute of Technology
Eiliv Sodahl

The Foundation of Scientific and Industrial Research at the Norwegian Institute of Technology (SINTEF) is not-for-profit organization performing R & D under contract to corporations, industrial associations, public service agencies, government departments and other clients whose principle activities are: Automation and Data Processing, Electronics - Acoustics - Physics, Social Research, Civil and Structural Engineering, Chemistry-Metallurgy, Petroleum and Geosciences, Machine Design and Production Engineering, and Hydrodynamics.

Oregon State University
Kim R. Smith

Offers technology relative to categories 1, 4, 13, 14, 18, 19, 20, 24 and 27 in areas of Agriculture; Forestry; Electrical, Chemical and Mechanical Engineering; Veterinary Medicine; Pharmacy; Food and Nutrition; Materials Science; Biochemistry, Biophysics, Molecular Biology and Genetics with especial offerings of animal disease diagnostics, therapeutics and vaccines, agents, and antiasthmatics and slow release technology, chemical analytical instruments and software for forestry and agricultural applications.

Osaka Univ. of Foreign Studies
Takao Mukoh

Technology Categories: No. 1, 2, 9, 10, 12, 13, 20, 11. Both In and Out. Interested in all phases of technology licensing and also in the related areas such as joint ventures, distributorship, agency and franchising, with particular emphasis on realistic negotiation processes and anti-monopoly aspects.

Paisley College of Technology
A. M. Leyshon

Interested in Technology in Industrial Services or liaison with especial interest in composite structures, soaps or cleaners, cadcam, hydraulics and pneumatics.

Pittsburgh, University of
Joseph P. Ciarimboli

Areas of technology in which we seek coopertive R & D and market development participation include developing consumer applications of "smokeless fuels" with carbon products.

Cleveland Clinic Foundation has established six centers of excellence; Cancer, Cardiovascular, Digestive, Musculoskeletal, Neurosensory, and Urogenital and Reproductive. Additionally, the Division of Research is divided into the following departments: Artificial Organs, Biostatistics, Cardiovascular Diseases, Clinical Science, Mollecular & Cellular Biology, and Musculoskeletal research.

Connecticut Department of Economic Development
Joan L. Landon

Seeks cooperative research and outside funding in all technology categories.

Cold Spring Harbor Laboratory
John Maroney

Offers technology relative to cell biology of cancer, diagnostics, oncogene, monoclonal antibodies, probes, vectors, oncogene activity detection, strong recombinant capabilities.

Dayton Research Institute, University of
Dr. Lloyd Huff

The University of Dayton Research Institute conducts basic and applied research in the Engineering and Physical Sciences for government and private industrial sponsors. Active areas of research include: materials development and testing (metals and ceramics; polymers; composites; plastics; adhesives; fluids and lubricants; and electrical, magnetic, and optical materials); structural analysis and testing, structural life prediction, vibration damping, thermal analysis, development of specialized instrumentation, surface science, environmental science, fluid mechanics, impact physics, optical physics and engineering, electronic and computer engineering, and technology forecasting.

Delaware, University of
Dr. R. D. Varrin

Seeks research, funding and has special expertise in fiber reinforced composite materials, photovoltaics, catalysts, food technology, biotechnology, marine technology, animal health products, computer software, engineering sciences, fiber optics, chemical process development, and plant sciences.

Duke University
Carl B. Wootten

A major Eastern research university with approximately 57 million dollars in research. Especially strong in the medical area, and about 85% of invention disclosures come from this area. As of January 1, 1986, 300 disclosures received, most of which are still active and available for license. Other strong areas are chemistry, engineering, and biomechanical engineering.

Georgia, University of
Patrick D. Green

The University of Georgia is particularly interested in research sponsorship and opportunities in the area of biotechnology. A major effort is being made by the University in the areas of botany, genetics, veterinary medicine, microbiology, agronomy, biochemistry, ecology, soil science, and dairy science to apply biotechnological techniques to increase food production and develop alternate engery sources. The University's Cyber 205 supercomputer and the accompanying Cyber Plus offer its academic and research community more computing capacity than any other facility in the world.

GMI Engineering & Management Institute
Dr. Rod L. Boyes

Current activities are in applied research and design and development engineering. Interested in applying technology to solve problems which have economic potential in technology categories 18, 20, 21 and 26 offering technology on manufacturing equipment and vehicle power trains and control systems as well as acquiring and offering technology related to medical devices (transducers, computers, software) and computers and software.

The Walter & Eliza Hall Institute of Medical Research
C. Hay or Dr. G. F. Mitchell

The Hall Institute has interests in immunology, cell biology, moleculer biology and biochemistry and has research programmes in cancer, transplantation, aufoimmune diseases and parasites. Principal biotechnology projects include Parasite Vaccines (e.g. Malaria, Schistosomiasis and Leishmaniasis) and Cell Growth Regulators (e.g. Colony-Stimulating Factors, CSFS and Interleukins).

Harvard University
David Stein, Nina Green or Joyce Brinton

50 inventions currently available, with the largest groups in Recombinant DNA and Diagnostics, with the remainder divided between Communications, Material Science, Molecular Biology Process Engineering, Chemistry and Energy.

These universities and non-profit organizations have submitted the following information about their activities, especially their special research expertise and technology available for licensing.

Agricultural Institute
P. McDonnell

The Agricultural Institute is the national research organization for the agriculture and food industries. Major programme areas include grassland management, animal production, food processing, basic veterinary research and biotechnology. We are interested in proposals for cooperative R&D ventures in the food product, plant breeding, agricultural machinery and biotechnology areas. We also specialise in the pre-launch evaluation of veterinary products, animal feeds and agrochemicals.

Arcanum Corporation
Helmut F. Stern

Offers technology in categories 10, 12, and 23.

A.R.E.P.IT.
Gilles Y. Bertin

Our non-profit organization specializes in economic studies on IPy and transfers, mostly in advanced technologies using contacts, information and individual contracts with firms. Our special expertise is in software and biotechnology technology transfer.

Bath, University of
C.L.S. Henderson

Specializes in technology categories 3, 5, 7, 8, 9, 10, 11, 12, 13, 14, 18, 19, 20, 21, 22, 24, 26, 27 and 28 in areas of Plant Science, Horticulture, Architecture and Building Engineering, Management Studies, Medical Engineering.

Battelle Memorial Institute
Joseph H. Oxley

Technology related to the use of fossil fuels or renewable resources in the production of power.

Battelle Development Corporation
W. E. Riley, Jr.

A subsidiary of Battelle Memorial Institute. Battelle Development Corporation (BDC) acquires technology from the Battelle Laboratories, universities, industry and individuals. It licenses this technology to industry throughout the world. BDC has a program wherein it works with select companies to define specific needs. Once such needs are identified BDC may invest its own funds in finding and demonstrating the feasibility of solutions to such needs. If feasibility demonstration is successful, the company is offered first rights to the property generated.

Berry College
Thomas P. Evans

Assists small and medium-sized companies, foreign and domestic, family-owned and public. Market and marketing programs, tech-transfer programs, including aggressive patenting and licensing. New product/process planning and development. Specialize in mechanical and electrical products/processes; forestry, wood products and wood composites; plastics; mineral processing; military hardware; nuclear and solar energy applications plus animal and animal feed technologies and agricultural chemicals and lawn care products.

BNF Metals Technology Centre
Dr. R. D. Johnston

BNF is engaged on many areas of R&D in the metals industries, including: instrumentation for improved process control; metalworking process development; improved furnace combustion and energy recovery systems; corrosion problems or marine environment and domestic plumbing systems; pursuing basic understanding of powder technology; and specialized computer software.

Boston University
Lawrence Gilbert

Seeks cooperative and funded research arrangements with government, individuals and industry.

Bradford University Research Ltd.
Lawrence West

Offers technology in categories 2, 7, 10, 18, 24 and 28 with special emphasis on textile research machinery, plastics processing, liquid/liquid extraction, ion exchange and electrostatic coalescence for mining, soft-

COMPANY NAME	COMPANY CONTACT	LICENSE INTEREST	SPECIFIC AREA OF INTEREST
Abbott Laboratories	Crovetti, A.J.	IN	Biocides, peptides
Adidas	Den Bossche, V.	BOTH	Shoes

INTERNATIONAL TECHNOLOGY DIRECTORY
LETTER OF INTRODUCTION

Dear LES Member:

This Directory was conceived and produced by the Technology Directory Committee of LES USA/ Canada. It is an expanded update of Directories that were published and circulated to all LES members in 1978, 1980, 1982, and 1984. This new edition is being sent to all LES members worldwide thanks to the support of LES USA/Canada and LES International.

The Committee hopes to update this Directory every two years. You will be contacted for changes or additions to your listing at that time.

The Directory's main purpose is to list technology areas available to licensing IN or OUT by our members. In the 1982 edition, new sections were added so that universities and nonprofit organizations could describe their activities, and technology transfer consultants and brokers could describe their expertise and modus operandi. These sections were well received and continue as a large portion of this Directory.

No addresses are listed in this Directory, since it is designed to be used with the enclosed Directory of Membership, both of which are available only to LES members.

Members who submitted a listing in the Directory should take it as a responsibility, as well as a courtesy, to respond to all requests for information arising from their listing. This will serve to strengthen the value of the Directory to the membership over the years. Some of the questionnaires that were returned listed only legal type services and these entries have not been included. In other cases where a lawyer or patent attorney responded with non-legal types of services, the individual member was listed but the name of the law firm/patent firm was deleted. This Directory is intended to help members locate licensing partners and services, but is not intended as a listing for purely legal services.

We have taken all reasonable steps to assure the accuracy of the information in the Directory, but users of the Directory must understand that there is no guarantee against errors occuring in the Directory. Also, the editor of the Directory cannot police compliance with the various regulations and ethics of many states and countries from which our members come. Rather, the editor must rely upon the persons requesting listing to comply with the legal and ethical standards that apply to each of them.

All comments or suggestions on the Directory are welcomed. If you feel this Directory is useful, please write and tell us, with a copy to your Member Society Officers.

Richard G. Geib, Editor

Penny Dalziel, Assistant Editor
