FAX 202-225-4450

"Ben see change in last ¶" Nom 2.

Amend Sec. 207(a) to add the following sentence.

"When granting either an exclusive or partially exclusive license, the Federal agency shall retain a non-exclusive, nontransferable, irrevocable, paid-up license to practice or have practiced the licensed invention for or on behalf of the United States throughout the world and may obtain additional rights to sublicense any foreign government or international organization in the licensed invention as required by (existing) treaty or international agreement."

Ben - comment - note that this covers only exclusive or partially licenses as conventionally such license is not reserved for non-exclusive licenses. Further, "the treaty or international agreement" is presumed to be existing at the time of licensing and is not intended to cover "future" treaties or agreements.

Ben - you wanted this before 2:00 — I have way to fix (b)(4) — strike "a research license" and insert therefor "the licensing of unpatented biological materials" ~~[illegible]~~

~~[illegible]~~
