INVENTION DISPOSITION REQUEST FOR SUPPORTING INFORMATION

1. Submit a statement of any equities you have in the invention which you believe to be appropriate for consideration by the National Science Foundation in determining disposition of rights therein.

2. Describe the relationship of the invention to the main purpose of the .

3. Please give your evaluation of the commercial possibilities of the invention:

   a. In its original embodiment, and

   b. Possible adaptations to other uses.

4. Describe the stage of development of the invention (e.g., concept only, laboratory demonstration, working model, etc.) and give your estimate of the time required to bring the invention to the point of practical application as defined in the President's Statement of Patent Policy.

5. Describe your plans and intentions for bringing the invention to such point of practical application including, if further development of the invention is necessary to make a salable or licensable thing or process, a description of such development and the facilities and personnel available for that purpose.

6. Describe the nature and extent of rights desired.

7. If you believe that rights greater than free public use are needed to bring the invention into use, give the reasons for such belief and the probable duration of such need.

8. List the countries in which you would be interested in filing applications for patents.

9. If publication of the substance of this invention has occurred or is contemplated, please state the name of the journal and date of publication.
