February 16, 1984

Clarence J. Brown
Deputy Secretary
U.S. Department of Commerce
Room 5838, Herbert Hoover Building
14th Street and Constitution Avenue, N.W.
Washington, DC 20230

Dear Mr. Brown:

The members of the Task Force on Technological Innovation would like to express their appreciation for your participation in the upcoming February 26 work session. I have enclosed a copy of the final agenda for that session and I am sure you will agree that you will be joining a most distinguished panel of guests. Governor Jim Hunt would like to invite you to join him, Task Force Governors, and other program participants at 9:00 a.m. in an informal gathering before the meeting for coffee and pastry in Columbia C, adjacent to the meeting room.

This agenda represents the broad range of perspectives and actors involved in the area of technology policies for economic development, and exemplifies the intergovernmental and intersectoral approach to coordinating state and federal technology policies emphasized by the Task Force membership. Also enclosed is a copy of the discussion paper, "Technological Innovation: State Initiatives and Federal Policy" which is intended to serve as the initial basis not only for the February 26 work session, but also for any continuing cooperative effort that might emerge from this meeting.

Members of the Task Force place a premium on maximizing the opportunity for informal discussions between themselves and panelists at their work sessions. For this reason, participants have not been asked to prepare individual presentations, but rather to be prepared to address a number of issues related to technological innovation as their particular expertise or position warrants. While we therefore anticipate a relatively informal and wide-ranging discussion focused around the central topic of joint state-federal technological innovation strategies, it would be helpful at this point to delineate several key issues of interest to Task Force members. This should serve, in addition to the discussion paper itself, to focus your preparations for this meeting. Six such possible discussion points involving intergovernmental cooperative issues have been attached. However, these by no means encompass the full range of possibilities. The Governors expect that you will feel free to interject points during the meeting you consider relevant and representative of your perspective.

A general state-level perspective has been outlined in the accompanying discussion paper. Other issues of concern to the Task Force members will emerge during the session as the Governors draw from their individual state and regional experiences. If you need any information regarding the Task Force or specifics on the meeting itself, please feel free to contact either me (624-7814) or staff assistant Brent Lane (624-7874).

Sincerely,

Charilyn W. Cowan

SELECTED TOPICS

Recent experiences of governors and states in pursuing individual technology development economic strategies have distinquished several potential areas for enhancing state and federal cooperative efforts. These six areas could be explored at the Task Force technology work session. A number of additional issues are expected to emerge from the meeting, but the following may establish some initial parameters for interaction:

1. State and local governments have been active in support of technological innovation through a great variety of mechanisms, yet the success of most such efforts depends directly or indirectly on economic factors transcending state and local jurisdictions. The federal government should play the primary role in establishing a national economic enviroment conducive to technological innovation activities. While a number of actions in regard to tax and monetary policies have been implemented, additional actions, such as extending the R&D tax credit, antitrust protection for joint R&D activities, and expanding venture capital availability to small businesses, may be necessary.

2. Given existing and future federal and state budgetary constraints, joint initiatives might most appropriately address mechanisms to optimize the utilization of existing scientific and technological research resources in support of economic development. An effort should be made to more effectively translate the results of federal R&D expenditures, in both defense and non-defense related areas, into civilian economy applications. Given the emerging role of state and local governments as technological facilitators in public/private sector relations, existing programs such as the Stevenson-Wydler federal laboratories provisions and the Small Business Innovation Research program might be amended to enhance their utility as components of state and local technology development strategies.

3. The Department of Commerce, the Small Business Administration, the Department of Housing and Urban Development, the National Science Foundation, and other federal agencies cumulatively administer a broad spectrum of programs which have supported traditional development activities according to each agencies' particular mission orientations. Though implemented at the state and local level, the mission-oriented rigidity of many such programs often denies the flexibility necessary to address state and local development priorities. The Community Block Grant Program was recently amended to permit increased flexibility in applying those funds to economic development activity. Other existing assistance programs should also be examined to identify means by which state and local governments might innovatively direct those programs to technology development efforts.

4. American "high technology" manufacturing industries possess a significant comparative advantage in international trading. Indeed, in a period of record trade deficits, the U.S. continues to run a substantial surplus in terms of advanced technology products. States are increasing their activity in support of international trade by encouraging local firms' participation through a variety of incentive programs. However, small businesses in general, and new technology-based ventures in particular, encounter a number of obstacles which often preclude their participation in the growing world economy. How might the federal government cooperate with state and local governments to encourage greater small business international trading activity, especially among those technologically innovative small enterprises which constitute important elements of most state technology development strategies?

5. Accelerating the commercialization process for innovative technologies has often required closer working relationships between research universities and local industry. Recognizing this correspondence, many states have attempted to institutionalize academic-industrial linkages and partnerships through a variety of mechanisms such as innovation centers, incubator facilities and direct research support. As the principal supporter of academic basic research at state universities, the federal government shares a mutual interest with states in promoting the utilization of these research efforts.

6. A perennial criticism of the R&D enterprise in the U.S. is that there is no apparent overall strategy. Such criticism has given rise to proposals to create a National Technology Foundation, or by other means to create a more cohesive way of formulating and carrying out goals and objectives with respect to scientific, engineering and technological pursuits. Running counter to these proposals is the contention that the Science Advisor to the President, the Office of Science and Technology Policy and the National Science Foundation, working with other federal agencies, Congress, state governments and private sector, comprise a suitable structure for effective strategic planning. If such a structure exists, how might it acknowledge and incorporate the growing leadership of states as actors in the technology policy arena? If such a strategy is to be considered, how might state-level leadership in developing the economic growth potential of technological innovation be enhanced?

SOCIETY OF UNIVERSITY PATENT ADMINISTRATORS

FIRST ANNUAL MEETING

By Lawrence Gilbert

The First Annual Meeting of the Society of University Patent Administrators (SUPA) is scheduled to be held on February 5th, 1976 in the Midway Room at the Holiday Inn / O'Hare Kennedy in conjunction with the World Fair for Technology Exchange fair sponsored by Dr. Dvorkovitz & Associates. Earl Friese of Northwestern is handling arrangements. A final program was sent to both SUPA members and prospective members during the second week of December. At this writing approximately fifty (50) Universities are members of SUPA.

A registration fee of $15.00 per person will be charged each SUPA member to cover operating costs. Individuals who register for the SUPA meeting can attend the Dvorkovitz World Fair for Technology Exchange Fair at no charge, whether or not they intend to present technology at the Fair. Dr. Dvorkovitz has been not only quite generous in granting to SUPA use of the Midway Room on the 5th but also in extending to those who attend the SUPA meeting a no charge policy in the event such persons do not intend to present technology but do want to attend the Fair.

In addition, as has been the custom in the past university-industry forums, Dr. Dvorkovitz is hosting lunch for the SUPA attendees on the 5th to be held at the Caravelle Motor Inn across from the Holiday Inn-O/K.

SUPA was organized in 1975 to fill a growing need to more fully exploit the university patent resource. SUPA hopes to stimulate and foster the transfer of university patent resources to the public sector by:

* presenting educational seminars to the membership on all aspects of technology transfer from the university point of view.
* generating self-help programs to enable universities to establish an in-house patent technology and licensing capability.
* effecting interchange of views amongst university patent administrators.

For further information, those interested in becoming members of SUPA may contact:

Ralph L. Davis
Associate Director
Division of Sponsored Programs
Purdue Research Foundation
West Lafayette, Indiana 47907

Registration Information:

The registration desk will be located outside of the Midway Room for registration at the following times:

Wednesday (4th)	4:00 P.M.-6:00 P.M.
Thursday (5th)	8:00 A.M.-9:00 A.M.

Name tags and program material will be provided in a registration packet available at the registration desk.

Dear XXXXX,

Thank you for visiting with us during the AUTM meeting in San Antonio. We appreciate your interest in USET's online technology database.

During our online demonstrations, you saw how USET's database has been designed for the busy technology manager. Our system is extremely easy to use. You can search full pages of text without the use of a thesaurus or complicated search commands.

Because of its information content USET's technology database provides powerful solutions to the issues encountered by both university and industry technology managers. These issues include: (1) identifying potential licensees; (2) marketing licensable technologies; (3) locating research expertise; and, (4) reviewing external technology developments. I have included a description of each of USET's technology databases with this letter.

I am interested in receiving your observations about our online database. Please call or write me regarding any comments you may have. I also welcome your questions about becoming an information provider or an online subscriber.

^F1^

Dear ^F2^:

If you are attending the 1990 Annual AUTM meeting in San Antonio, I would like to invite you to join us for the first public demonstration of USET's prototype online technology database. We are happy that most who attend will find information concerning their own institution on our database. USET is hosting this event immediately following AUTM's Welcoming Reception on Sunday, February 18 with an open bar and hors d'oeuvres reception from 7-9 PM in the Regency Center Ballroom.

We are all aware of the rapidly changing political and economic conditions in the world today. These changes have created an unprecedented worldwide demand for new technology and collaborative research partnerships. Our database has been designed to assist you in taking full advantage of this opportunity. When complete, we will provide the international business community with a single depository of hundreds of technology portfolios from around the world coupled with a state of the art search capability.

I believe that as you use our database in San Antonio, you will appreciate the simplicity with which a subscriber can quickly obtain technology information from multiple sources. In addition to Sunday evening's online demonstration of USET's information service, we will also be scheduling small groups for other online sessions. These sessions will occur throughout the day Monday and Tuesday, February 19 and 20, in USET's suite. Dr. Daphne Lambright and I will be available for questions and scheduling.

We look forward to seeing you in San Antonio.

Sincerely,

Norman J. Latker
Vice President
Legal and Technology Affairs

FIRST PUBLIC DEMONSTRATION OF USET'S ONLINE TECHNOLOGY DATABASE

Dear AUTM Meeting Attendee:

We would like to invite you to join us for the initial public demonstrations of USET's easy to use, online technology search database. We are happy that most who are attending will find information concerning their own institution on our database.

USET is hosting its **FIRST DEMONSTRATION** in the **Regency Center Ballroom** immediately following AUTM's Welcoming Reception:

Sunday,	**February 18**	**from**	**7:00 to 9:00 PM**

An open bar and hors d'oeuvres will be available.

ADDITIONAL ONLINE DEMONSTRATIONS will be conducted in **Suite 431** of the Hyatt Regency on:

Monday,	**February 19**	**at**	**2:00 PM, 3:00 PM, 4:00 PM, 5:00 PM**
Tuesday,	**February 20**	**at**	**9:00 AM, 10:00 AM, 11:00 AM**

Dr. Daphne Lambright and I will be available for questions and special scheduling if the times above are not convenient.

We are all aware of the rapidly changing political and economic conditions in the world today. These changes have created an unprecedented worldwide demand for new technology and collaborative research partnerships. Our database has been designed to assist you in taking full advantage of this opportunity. When complete, we will provide the international business community with a single depository of hundreds of technology portfolios from around the world coupled with a state of the art search capability.

I believe that as you use our database, you will appreciate the simplicity with which a subscriber can quickly obtain technology information from multiple sources.

We look forward to seeing you in Sunday in the Regency Center Ballroom and Monday and Tuesday in Suite 431.

Sincerely,

Norman J. Latker
Vice President, Legal and Technology Affairs

REED LTR

UNIVERSITY SCIENCE, ENGINEERING AND TECHNOLOGY, INC.
(Affiliate of The Maxwell-Pergamon Publishing Group)

January 18, 1990

Dear :

Thank you for your interest in USET's full-text technology database. As you requested during your phone conversation with Dr. Lambright of my staff, I am sending this description of USET's on-line service.

USET designed the technology on-line system for those individuals interested in exploring available technology opportunities, primarily industry licensing executives. USET on-line database subscribers can find and track technology developments quickly and easily. USET's technology on-line system uses innovative search features. These features enable subscribers to search USET's full-text technology databases without the use of thesauri or complicated search commands.

The USET technology on-line system is an information source consisting of several full-text, technology-oriented databases. USET is collecting this information from universities, federal laboratories and industry. Most of this information is unique to the USET on-line system. USET lists non-enabling descriptions of licensable technologies collected from universities, federal laboratories and industry. USET also provides summaries of research activities in progress at universities, federal laboratories and small businesses in the database. In addition, USET includes descriptions of R&D services and facilities available to the public on a fee basis at universities and federal laboratories.

A major feature of USET's on-line database is the listing of non-enabling abstracts of licensable university technologies. This information is not available in any other publicly accessible on-line database. USET provides this non-exclusive listing service without charge to universities. When a university enters into a license agreement with a USET database subscriber, USET collects no royalties or commissions.

The technologies listed on the USET database include those with patents and those with patent applications. USET also lists those technologies which do not normally enter the patent process (i.e.,

4550 Montgomery Avenue • Suite 430 North • Bethesda, MD 20814-3304 • Tel (301) 961-8575 • Fax (301) 961-8570

software or monoclonal antibodies). USET does not require you to fill out special forms when submitting your technology descriptions. USET accepts technology abstracts in hard copy or electronic form.

We look forward to working with you and your staff. Please don't hesitate to contact me with any questions or comments you may have.

Sincerely,

Norman J. Latker
Vice President
Legal and Technology Affairs

January 18, 1990

Dear :

Thank you for your willingness to participate in USET's full-text, on-line technology database. As you requested during our phone conversation with Dr. Lambright of my staff, I am sending you this letter which describes our on-line database service.

The USET Technology database contains information related to technology and technology transfer. A major feature of our database is the listing of non-enabling abstracts of licensable technologies currently available at major universities. This listing service is provided free of charge to universities. There are no royalties or commissions charged when a listed technology is licensed.

The technologies listed on the USET database include those with patents, those with patent applications, and those technologies which do not normally enter the patent process (i.e., software or monoclonal antibodies). Our licensable technology database consists of the following information fields:

1. Creating University
2. Inventor (s)
3. Title
4. Description of Technology
5. Potential Application of the Technology
6. Advantages of this Technology
7. Patent Status (Patented, Patent Pending, or Tech Note)
8. Submit Inquiries To (UT Research Corp. Contact Name and Number)
9. Reference Number (UT Research Corp. Internal ID Number)
10. License Terms
11. Keywords (Not Required)

USET accepts technology abstracts in hard copy or electronic form and will format the information as needed upon receipt. You are not required to reformat your information.

4550 Montgomery Avenue • Suite 430 North • Bethesda, MD 20814-3304 • Tel (301) 961-8575 • Fax (301) 961-8570

Likewise, your submitted technology descriptions do not have to include all of the above listed fields. The information fields are only listed to provide you with an insight to the kinds of information we can incorporate into our database.

We look forward to working with you and your staff. Please don't hesitate to contact me with any questions or comments you may have. Again, thank you for your cooperation.

Sincerely,

Maumelle, Ark 72118

A copy of the tax exemption certificate is required for our records. Upon receipt of the tax certificate, all sales taxes for your food & beverage will be adjusted off the final bill.

ATTENDANCE POLICIES

Hyatt Regency San Antonio will need a final guaranteed number of guests who will be attending the event by 11:00am Thursday, February 15, 1990. As a service, Hyatt Regency San Antonio will prepare for 5% over the guaranteed number to accommodate unexpected guests. USET will be charged for the guaranteed number or the number of guests served, which ever is greater.

MENU & ARRANGEMENTS

Enclosed please find our current menu selections for your review. However, Hyatt Regency San Antonio will be happy to work with USET on any special requests. Menu prices do not include 17% service charge or applicable sales tax.

All arrangements need to be finalized by Thursday, February 1, 1990. Menu prices do not include 17% service charge or applicable sales tax.

All food & beverage items to be served must be supplied by Hyatt Regency San Antonio, unless prior approval has been made.

Also, enclosed please find an electrical form for USET, please fill in and return it to us at your earliest convenience. Any charges will be applied to the final balance of the event.

DECORATIONS

Hyatt Regency San Antonio reserves the right to approve any decorations by any organization or individual within hotel property. The decorating of function rooms requires a schematic of said decorations and descriptions of items used, and must meet with hotel approval.

CONCLUSION
Hyatt Regency San Antonio is pleased to host USET's Hospitality.

To make these arrangements definite, please sign and return the enclosed copy of this letter to Hyatt Regency San Antonio by Tuesday, January 30, 1990. Please keep this copy for your files. Should Hyatt Regency San Antonio not have a signed copy of this letter from USET, all public space and arrangements will be released.

Thank you,

Dear Ms. Lambright:

I want to take this opportunity to thank you, on behalf of the entire staff, for holding your recent function at the Hyatt Regency San Antonio.

I truly enjoyed being of service to you and your guests and hope that all those who attended were satisfied with our service and facilities. We welcome any comments you may have on the hotel and staff that will allow us to improve our service to you in the future.

Ms. Lambright, it was a pleasure working with you on all the arrangements. I hope that you and your guests will consider the Hyatt Regency San Antonio when planning your next function.

Sincerely,

EXHIBITOR'S REPRESENTATIVE: Dr. Daphne Lambright 11 Yukon Cove Maumelle, AR 72118

(501) 851-3722 BOOTH OR ROOM NO.: Regency Center

GENERAL INFORMATION

Wall, Column, and permanent utility outlets are not to be used by exhibitors, and are not part of the rental space.

Under no circumstances shall anyone other than the electrician make any electrical connections.

The Chief Electrician has the power to refuse connections where wiring of extension cords constitutes a fire hazard.

All material and equipment furnished by Hyatt Regency San Antonio will remain the property of Hyatt Regency San Antonio.

SERVICE DOES INCLUDE POWER TO ONE POINT AND CONNECTIONS WILL BE MADE DEPENDING ON OUTLETS REQUESTED.

(Example) — Single outlet includes one extension cord to point of exhibitor's equipment including a $25.00 charge.

EXHIBIT SERVICE REQUIREMENTS

• Standard Conditions for Exhibit and Displays •

NON-FLAMMABLE: All material used in the Exhibit Hall, Ballroom or any other room of the Hotel MUST be non-flammable to conform with the Fire Regulations of the City of San Antonio. Electrical wiring and equipment installation must conform to appropriate N.E.C. Material not conforming with such regulations will be removed immediately at the exhibitor's expense. Engines, motors or any kind of equipment may be operated only with the consent of the Director of Engineering of the hotel.

SPECIAL NOTICES: No nails, or bracing wires used to erect displays may be attached to the building without written consent of the Director of Engineering of the hotel. All property destroyed or damaged by exhibitors must be replaced in its original condition by the exhibitor or at the exhibitor's expense. No exits should be blocked at any time, for any reason.

LIABILITY: The hotel will not be responsible for any injury, loss or damage that may occur to the exhibitor, the exhibitor's employee of property, or to any other person, prior, during, or subsequent to the period covered by the exhibit contract, provided such injury, loss or damage is not caused by the wilful negligence or wrongful act of an employee of the hotel. Each exhibitor expressly releases the hotel from such liabilities and agrees to indemnify the hotel against any and all claims for such injury, loss or damage.

INSURANCE: Exhibitors who desire to carry insurance on their exhibits must place it at their own expense.

SPECIAL SERVICES

In those instances where your needs cannot be found in the list below, please describe your requirements. This work will be done and charged on a time and material basis.

NOTE TO EXHIBITORS

An Electrical Service Order Form should be completely filled out when requesting Electrical Services. All forms should be sent to the Chief Electrician at least two weeks prior to the exhibit. A late fee of 1.5 times the normal amount will be charged for last minute requests. All Electrical charges must be paid in advance. Checks should be payable to the Hyatt Regency San Antonio and sent along with the form.
